Summary: (machine translated) rappel canyon		
Hydrology:		
Access: (machine translated) Coming from Florence on the A1, passing Arezzo and Orvieto, leave it 41 km after Orvieto at the Orte exit and continue on the SS 204 in a northeasterly direction to Terni. You still have to cross the city to get onto the SS 209 ('Valnerina') which goes up the valley of the Nera towards Visso. After 26.5 km from the center of Terni you reach Ceselli (municipality of Scheggino), a few houses on the side of the road. Here you turn left onto a little road that leads to the village of Pontuglia. Where the road crosses the stream, you can park the lower vehicle. Also 200 m further on the road, on the left, there is a larger parking area. With the second car or on foot, continue along the road in the direction of Cese. About 500 m before the village, on the righthand side, there is the cemetery of Cese. Here you can park the second car.		
Approach: (machine translated) From the cemetery, continue up the road for a few meters until a mule track turns off to the right at a sharp angle. Follow this path and after a while you will cross a side stream of the Casco and reach a largely treeless shoulder (from the cemetery about 45 min.). If you want to get directly to the interesting narrow part of the canyon (see 'Figlie dell'Acqua e dell Tempo' E2a !), go down beyond the shoulder over the meadow on clear tracks and then descend more steeply (handrails) through the forest to the entry (10 min.). The path is very slippery here, but a 'commercial' has secured it with ropes. If you want to enter the ditch further up - conventional access - you continue along the mule track towards the village of Sensati, which is no longer inhabited. About 100 m before reaching the houses, at a leftward haipin bend, a track branches off to the right, which is subsequently marked with red markings and leads down to the stream (see 'Figlie dell'Acqua e dell Tempo' E2b and 'Gole & Canyons' p. 70).		
Tour: (machine translated) Initially open forest canyon, then nicely cut until the large and beautiful waterfall. After that open again, but not without charm. Subsoil grippy (lime).		
Return: (machine translated) Soon after the last rappel point, you come across a dirt road on the orographic right bank, which leads in about 15 min to the road bridge, near which the - lower - vehicle is parked.

Long but beautiful and relatively easy approach. Start at the middle entrance, where you are just above the beautiful part. The tour itself is an entertaining abseil canyon. (machine translated)
