<b>Specialities:</b>		
<b>Gear:</b> Ropes: 2x30m		
<b>Summary:</b> (machine translated) Wild forest canyon		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) A-10 from Voltri (Genoa), exit Arenzano; on the SS-1 west towards Cogoleto, Varazze. After about 200 m, Via Giappone branches off to the right towards Terralba. In Terralba, turn left (after a right turn) into Via Pecorara. The road initially heads north, then bends to the west. Go through Pianaletta and cross the Rio Lissola. At a fork, go up to the right (Via Checchelli). After a few hundred meters you come to a widening of the road where the "main road" goes up in a serpentine on the right, but another tarred road goes down on the left. Here we park the car. On the slope side quite a mess of junk and tools.		
<b>Approach:</b> (machine translated) We now follow the road leading down to the left to some houses (do not take the meadow path turning to the right!). Just below the houses we come across a path running along the slope, which we follow to the right. After about 20 min. we come to the Ponte Negrone, which leads over the Rio Leone. Immediately after the bridge, the path turns right (do not go straight!). After another 15 min. or so, the path crosses the Cu du Mundu coming down from the left (exit point at about 300 m). Continuing on the path, we now go uphill in several hairpin bends. After an additional approx. 40 min. the path branches off (approx. 580 m sea level). We take the left and come in a few minutes to the entry. Mostly directly on the orographic right bank also pulls a partly exposed steep track up the canyon.		
<b>Tour:</b> (machine translated) Relatively narrow wild forest canyon with some opportunities for jumping. Slippery.		
<b>Return:</b> (machine translated) Where the stream crosses the ascent path (see above access).

2024-06-01 | System User | |📖|📍|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Cü du Müнду Descente à ne pas prendre à la légère du fait de sa cotation relativement faible. L'enchaînement des rappels est continue et avec ce débit peut poser problème pour des équipes non aguerris. Préférez prendre 2x 40 m pour être serein si vous ne connaissez pas le parcours. Nous avons dû bartasser et éviter le quatrième et cinquième rappels car nous étions trois court pour aller checker les amarrages suivant. Cascades évitable en RG. Avons casser et nettoyer plusieurs troncs mort menaçant... L'équipement est aléatoire. Parfois très correct parfois pas suffisant. Pensez à prendre de quoi rafraîchir tout ça ... Ça glisse dans les rappels, les déviation ne sont pas forcément bien placées ou manquante par endroits. L'enchaînement n'est pas si long mais à prendre avec précaution si vous n'êtes pas aguerris aux techniques d'enchaînement de verticales.
