<b>Specialities:</b>		
<b>Gear:</b> Ropes: 1x70m, 1x60m		
<b>Summary:</b> (machine translated) The Brusnik stream, which is narrow and deep in places and mostly low in water (approx. 2/3 of the tour) flows into the much more aquatic Rocica stream (approx. 1/3 of the tour), which leads us back to the lower parking lot via a 60m waterfall.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) Lower parking lot: Coming from Bovec, follow the signs for Campinplatz Lazar in the village of Kobarid, cross the Napoleon Bridge onto the left bank of the Soca and continue south to the village of Ladra. In the village, take the third turning on the left (just before the bridge over the Rocica). Drive to the exit of the road and park. Upper parking lot: From the lower parking lot back to Napoleon Bridge. Leave the bridge on the left and follow the winding road up to the village of Dreznica. There follow the signs to Kosec. In Kosec itself it is somewhat difficult to find a non-private parking lot. If in doubt, ask nicely. Car change =8km,15min. driving time.		
<b>Approach:</b> (machine translated) At a distance of 30m from the southern abutment of the bridge over the Brusnik in the village of Kosec, a path leads across fields down to a chapel. Behind the chapel, go through the gate in the fence and look for a good place to abseil from one of the trees. It is not worth entering the stone-lined streambed at the road bridge.		
<b>Tour:</b> (machine translated) Initially deeply incised canyon with poor water quality. The protection sometimes consists only of old 8mm bolts. An emergency exit is only possible at the confluence with the Rocica. Here the water volume triples in favor of better water quality. Spectacular is the massive 60m final waterfall, which is rappelled outside the waterline and flows into a huge pool. A much longer haul-off rope is practical here.		
<b>Return:</b> (machine translated) After the 60m waterfall, hike a little further along the streambed until you can exit onto the path on the right.

## Reports:

2024-08-03 | Georg Rudelstorfer | ★★☆☆ | 📖★ | 📍★★ | 🌊 Low | 🟢 Completed

Really beautiful and varied tour. In the upper part with little water and deep cuts, the route leads to the mouth of the Rocica without long walking passages. The protection was significantly improved during the last ascent and is now quite ok. There are currently a few trees in the canyon, but they can be easily bypassed. There is a partially secured path at the mouth where you will meet hikers and which can also be used as an exit. The water quality increases abruptly in the Rocica. The impressive 65m waterfall can be reached via a relatively long walk with downclimbs from time to time. Our 60m CE4Y rope was not quite enough and we used a 70m semi-static rope. (Perhaps a 60m with rope stretch would be sufficient). After another 5m rappel and a short walking passages, the exit follows on the right until you reach the gravel road that leads back to the village. In the Rocica there are only 3 rappels in total, but with the 60m waterfall and the deep blue pools it is definitely worthwhile. All in all, the Brusnik is a wonderful canyoning tour that combines two completely different canyons. (machine translated)

2024-02-18 | Horst Lambauer | ★★☆☆ | 📖★★★ | 📍★ | 🌊 Normal | 🟢 Completed

Walked the canyon today. I have slightly adapted the description and added the coordinates of the parking lots. Description fits very well. Brusnik is narrow with layered limestone but there is a lot of turbidity in the water. Nevertheless interesting and geologically beautiful. The hook quality is moderate and you should have an emergency bait set with you. As soon as you get into the Rocica, the water quality suddenly improves with very nice individual spots with a few jumps and rappels and the highlight - the 60m waterfall into the deep blue basin. The quality of the water in the Rocica is much better than in the Brusnik. Allegedly there is nothing above the mouth of the Brusnik except for a rappel (possibly a jump). But there should be the possibility to climb up just before the Brusnik joins the Rocica orthographic right of the Via Ferrata and then enter the Rocica just before the beautiful single pitch (we didn't do this, but I looked at it on the map afterwards). (machine translated)
