Summary: (machine translated) A very beautiful canyon with rock with a good grip.		
Hydrology:		
Access: (machine translated) D900, from Le Lauzet-Ubaye, head towards Barcelonnette to reach the village of Les Thuiles. In this village, turn right onto the D109. Immediately after the bridge over the Ubaye, turn right, then left after the small bridge over the Gimette. 450 m further on, downhill parking lot on the right just before a hairpin bend (wooden information board and small bench). Uphill parking lot: Walk 2 km and park without obstruction at the level of the Gaffe bridge.		
Approach: (machine translated) Without shuttle bus: Leave your car at the parking lot on the valley side and walk up the small road to the Gaffe bridge, which crosses the torrent.		
Tour: (machine translated) First there is a walking area with some de-escalations and abseils. This is followed by an indentation with some more or less watered abseils, which can be up to 25 m long. At the exit of the canyon, there is a walk with some de-escalations along a pipe that runs alongside the stream.		
Engagement Opportunities to get to safety outside the high water in some places where the embayment is missing. Escape routes are unclear or non-existent until the exit of the embayment (RD pipe).		
Time period/ water character The current can be considerable and some abseiling points are watered. In strong currents, two pools may have water movements that need to be managed. The last rappel is equipped high in RD and requires a climbing step, it is better to stay on the rope of the previous rappel to reach it.		
Historical overview 1956 Honnorat and Reynier		
Return: (machine translated) Continue along the watercourse, 15 mins along the RD sewer (pipe), past a large flat rock and then RG exit via a path leading up to the road at the lower parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Gimette Canyon esthétique à faire le matin pour avoir le soleil ! Les amarrages sont en bon état (main courante exposée entre C18 et C12). La piste est fermée donc on ne peut pas faire la navette et on se gare 100m avant le parking aval. Attention aux chutes de pierre dans ce canyon !Tps 5 pers. : 35mins approche + 2h10 de parcours + 10mins de retour) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/285/observations.html>)

A very beautiful canyon with rock with a good grip. The water was murky on our tour and had a strong smell at first. The condition of the anchor points was mostly very good (2 pitons or a chain). No access/return route in case of reparking, but the road is currently closed. (machine translated)
