Country: Österreich / Austria Region: Oberösterreich Subregion: Bezirk Kirchdorf Town: Sankt Pankraz		
Difficulty: a little difficult	Grading: v4 a2 III	Total time: 6h30
Approachtime: 1h50	Tourtime: 4h	Returntime: 40min
Altitude entry: 1040m	Altitude exit: 690m	Delta Altitude: 350m
Canyon length: 2200m	Highest rapell: 40m	Amount rapells:
Transport: on Foot	Rock type:	drainage area: km ²
Season:	Orientation: North	Best Time:
Rating: ★ 3.3 (4)	Info: ★ 3 (1)	Belay: ★ 2 (1)
Specialities:		
Gear: Ropes: 2x 40m		
Summary: (machine translated) Remote rappel and slide canyon with three parts. The first part is steep with beautiful rappels, the second part is a pure hiking canyon in bedrock, the third part is a beautiful, very narrowly cut low gorge with many slides. Part II and III would actually be perfect for kids if it weren't for the long access and return. Very well equipped (glued anchors and chain anchors); beautiful mountain scenery; cold water; rappel mostly in the watercourse; several emergency exits possible on the right; long access with a ban even for bicycles (still worthwhile).		
Hydrology:		
Access: (machine translated) Take the A9 to the St. Pankratz-Hinterstoder exit. Then continue on the B139 towards Klaus and a few kilometers further turn off towards Steyrling. Follow the asphalt road through the village which then turns into a gravel road. Follow this gravel road past the forest cemetery until directly in front of the barrier with the sign "Fahrrad Fahrverbot" and forest road. Here you can park on the left (if full, park 100m before).		
Approach: (machine translated) From the barrier follow the wide forest road (trail 430) for 30-35min (1st fork left, 2nd fork right, 3rd fork right). After the 3rd fork, follow the forest road into the valley head. Just before the exit of the forest road, follow the visible path next to the stream. The path first runs on the orographic left side and then crosses the stream (exit). A wire rope on the other side of the stream is very helpful for the further course on the orographic right side. You follow the path, which is not always easily recognizable, until you reach a hunter's stand. From here you can already see the last 30m waterfall. From the hunter's stand descend further to the left (wire ropes) and across the boulder field (streambed). On the other side, a narrow steep path secured with wire ropes leads into the upper Taurus cirque up to 1040m (entry above the high 42m waterfall!).		

Tour: (machine translated)

The canyon is in a beautiful remote area and can only be reached on foot. The long access should not discourage but because you make only at the exit right altitude. At the beginning of the tour you stand in the large Tierkarkessel where it starts without much distance immediately with the first of 11 abseils. The pools in the canyon are mostly gravel, but you get a good shower at some rappelling points. It is also worth mentioning that there are numbered badges from the Berg- und Canyoning Einsatzgruppe OÖ at most of the rappelling points. The belaystation at the highest rappel point (42m) can be reached by a removable rope traverse. The chain anchors at the last two high (32m and 30m) rappelling points are placed very high, but can be reached easily. After the last high waterfall there is only a small step which is quickly overcome by means of ropes from anchors (left). After that you could get off at about 850m on the right back to the access path. We recommend to follow the creek for about 30min. without a big difference in altitude (slides, small pools, nice turns and small descents). At the point where the path crosses the stream, you should get off to the left (approx. 800m), as in our opinion it does not pay to continue descending (a lot of wood, short narrow section, one abseil). In case you go further: Part II: hiking canyon with a few mini slides. In the middle there is a 4m waterfall that can be rappelled or jumped - scree canyon on bedrock.\nPart III: Low but narrow cut with beautiful washouts in the white rock. Rappels (max. 10m) are only possible where tree obstacles block the gorge. The gorge ends at the exit of a dry streambed from the left at the level of 'Paukenhansel'. \nIf you want to walk the whole canyon to the mouth of the Steyr, you have to walk about 35min through the Heindlboden gorge, then a short gorge with some jumps (unfortunately often dry - the water seeps away just before the gorge and reappears at its exit) and another 40min of walking to the Steyr (possible jumps 3m before the mouth).

Return: (machine translated)

Follow the flat access path and the forest road back to the parking lot

If as described above part 2 and 3 are also walked:

Climb tracks left to the forest road, then on this back to the parking lot.
