Summary: (machine translated) Hiking, swimming and downclimbing in a narrow canyon		
Hydrology:		
Access: (machine translated) Leave the A-9 'la Languedocienne/la Catalane' (Montpellier-Barcelona) at exit 41 shortly before Perpignan and take the D-117 through Rivesaltes in the direction of Quillan. Approx. 35 km from Rivesaltes, you reach Saint Paul de Fenouillet, where you turn right (north) onto the D-7 (towards Cubières sur Cinoble). After about 41½ km of driving, the last part uphill, you reach a large parking lot at the entrance to the canyon, where you also get a good overview. Park your car here.		
Approach: (machine translated) Continue along the road blasted into the rock high above the canyon until you can easily descend to the left into the streambed of the Agly.		
Tour: (machine translated) The canyon, which is up to 100 m deep, offers an impressive tour, which is also heavily frequented commercially and is very suitable for beginners. helmets are essential due to the risk of objects being thrown into the canyon from the road above. Short ropes can be helpful.		
Return: (machine translated) As soon as the canyon widens, turn left up to the parking lot. You can also continue for approx. 400 m through another narrowing (mainly swimming) and then up to the left after the dam (30 min.)

Automatisch importiert von Descente-Canyon.com für Canyon Galamus Vous pouvez faire peu de sauts et de toboggans car il n'y a pas de débit.N'oubliez pas de prendre la corde car il n'y a pas de corde fixe et il faut monter la main courante ou faire le rappel. Automatisch importiert von Descente-Canyon.com für Canyon Galamus Toujours aussi beau comme randonnée aquatique, équipement r.a.s mais il manque un petit quelque chose, on s'est régalaé ! C'est pas la meilleure période pour le descendre car débit très faible. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/231/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Galamus Bonnes conditions.Aucune difficulté, marche aquatique plutôt ludique.Version courte faite en 1h15, le chemin qui monte à l'hermitage est indiqué par un panneau sortie en RG. Compter 20 min de plus pour faire la version longue (sans grand intérêt mis à part un petit rappel en RG évitable par la cheminée RD mais non sautable) et arriver à un barrage où le chemin semble partir RG.
