Country: Italia / Italy Region: Sardegna Subregion: provincia dell'Ogliastra / Province of Ogliastra Town: Villagrande Strisàili		
Difficulty: a little difficult	Grading: v4 a3 III	Total time: 5h25
Approachtime: 15min	Tourtime: 4h45	Returntime: 25min
Altitude entry: 800m	Altitude exit: 420m	Delta Altitude: 380m
Canyon length: m	Highest rapell: 50m	Amount rapells:
Transport:	Rock type:	drainage area: km ²
Season:	Orientation: Northeast	Best Time:
Rating: ★ 2.5 (1)	Info: ★ 0 ()	Belay: ★ 0 ()
Specialities:		
Gear:		
Summary: (machine translated) Rappel canyon in granite		
Hydrology:		
Access: (machine translated) see google sketches in "photo gallery"		
Approach: (machine translated) From the road we follow the track downhill. At a junction we keep half-right downhill. Finally, the slope describes a striking left turn. Here we go half-right down into the streambed without any problems. (see also Google sketch)		
Tour: (machine translated) Abseil sequence: see http://www.associazionesegnavia.it/canyoning/vigo.htm see also video 1 and photos Entrance (2) , if necessary also emergency exit at the bridge possible. IdR you finish the tour at the foot of the high waterfall. A further descent to the confluence with the Riu Irei is also possible. This offers an additional 20m rappel. However, this requires a wide shuttle (see in this respect C. Conca aaO and Google sketch in "Photo Gallery").		
Return: (machine translated) At the foot of the high waterfall so right out and on clear tracks up to the road; there right to the car at the bridge. (see also Google sketch in "Photo Gallery").		
Coordinates: Canyon Start 39.9428 9.5075 Canyon End 39.9532 9.5230

Automatisch importiert von Descente-Canyon.com für Canyon Bau Vigo Bau Vigo express : Corde coincée dans le C20 du départ dans une petite souche coincée dans une fissure. Je suis remonté selon descriptif de la fiche canyon puis j'ai scindé le rappel en deux parties (en me servant de la plaquette de la dèv située 6 m au dessus du sol). Surprise aussi sur les longueurs de corde, sur la 100 m il y a bien le départ de la main courante mais plus le relais situé dessous car il a été démonté, ce qui rajoute de la longueur de corde puisqu'on part donc de la main courante, auquel il faut rajouter la longueur de corde de la section suivante (relais démonté ou alors on ne l'a pas trouvé???) - au final on avait une corde de 80 m et une 60 m en secours qu'on a relié ensemble et c'est passé - quand au dernier rappel il fait bien 40 m et non les 23 m indiqués sur la fiche canyon mais j'ai corrigé. Prévoyez suffisamment de corde. J'ai trouvé le canyon sympa. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23102/observations.html>)
