Summary: (machine translated) Long forest canyon, not unattractive, long access		
Hydrology:		
Access: (machine translated) From Ventimiglia up the Roya to Breil-sur-Roya (25 km). Parking on the right bank of the Roya, opposite the old town.		
Approach: (machine translated) We leave the old town to the south at 290 m a.s.l. (marker "3") and follow the footpath that runs along the left bank of the Roya. After about 400 m, at the mark "105", at a small chapel, we turn left on a path towards Vésaire and Serre de Pozzo. We pass the houses of Vésaire (about 25 min.) and continue climbing above the Vallon de Carleva. After about 1.5 hours from Breil we cross a side valley. The trail now heads southeast and after another 20 min. reaches a fork (850 m a.s.l.) on the right down the Carleva (information board). You can shorten the access and the descent by taking one of the paths on the right down into the streambed beforehand.		
Tour: (machine translated) Many slides and jumps (the T 19 is dangerous because you can violently scrape against the wall before entering the pool). A lot of walking, a series of small rappel.		
Return: (machine translated) Before the bridge, climb up to the path on the left, secured with wire ropes and iron clamps. Cross the bridge and take the footpath above it up the Roya back to Breil.

Automatisch importiert von Descente-Canyon.com für Canyon Carléva Descendu à trois avec Mathias et Bertrand. Marche d'approche agréable avec les températures actuelles. Très belles cascades et une eau magnifique. Superbes vasques même si les sections du canyon où il faut marcher sont un peu longuettes. Ne coulait pas trop toutefois malgré les pluies récentes. Végétation bien verte cependant : les cheveux de Vénus en pleine forme même à distance de l'eau. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2237/observations.html>)

Everything is tip top! It has the potential to be a great fun canyon in places (slides/jumps) if you know the spots well. The slides are great and some of them can be done over 10 m or from the very top. Some walking. There are many well-trodden paths next to the stream that make progress easier. Very grippy rock. Approximately in the middle is a wooden sign orthographic left, with "emergency exit possible". All rappels with double U-bolts (as good as new). Beautiful sintered sections. (machine translated)
