Summary: (machine translated) Watery rappel canyon. It is the first of four river stretches of the Estéron that are canyoned. Very frequented by commercial groups during the season. Not without danger during stronger water flow because of the backwaters.		
Hydrology:		
Access: (machine translated) From the valley of the Estéron we take the D 2211 direction St. Auban. Already before the village we park a car at the Maison des Services au Public de Saint-Auban. If we have a second car, we continue downhill along the left canyon rim and after a few switchbacks we reach a bridge over a side stream of the Estéron. A few meters later, we can park the second car in the open space on the left.		
Approach: (machine translated) From the bridge on the road first past the parking areas for hikers, climbers and fishermen at the site and left of the Esteron the road award.... Shortly after the tunnel at the break in the railing down to the right into the river.		
Tour: (machine translated) Although the canyon can be seen from the road on large parts, the walk is a very sporty affair, which can not be recommended to beginners. The abundance of water leads in some places to sweeping waters and backwaters. The highest waterfall (a few meters after passing under a rope bridge made of 2 steel ropes) should not be rappelled at more than 500 liter/sec, although you can rappel through it and come to a stop behind the waterfall. A (not easy) change from the right to the left side of the gorge is possible here, as well as a climbing traverse to the left down around an edge and with several intermediate pitons and a tree to a sloping slab from which to jump. A rope ferry is also possible here and is used by commercial guides. These, by the way, only grab the rope 2x.		
Return: (machine translated) Where the canyon widens considerably and a side stream flows in from the left, follow the clear footprints to the left into the valley of the side stream and across a forest road to the parking exit.		
Coordinates: Canyon Start 43.8508 6.7298 Canyon End 43.8568 6.7267 Parking at Exit 43.8578 6.7240 Parking at Entry 43.8468 6.7289

Automatisch importiert von Descente-Canyon.com für Canyon Saint Auban Ras niveau équipement, très beau canyon esthétique et fun car nombreux sauts et petits tobs possibles . Bien sonder quand même car la couleur de l'eau est trompeuse.Beaucoup de guides au début mais ils sont cool et laissent passer . Automatisch importiert von Descente-Canyon.com für Canyon Saint Auban RAS, très beau. Personne dans le canyon en y rentrant a 12h.Parking canyon amont a l'entrée du village. Pour le parking aval, longer la clue, puis tunnel routier, épingle a droite, la route descend, le parking est alors dans l'épingle a gauche suivante, sortie du canyon.Cela dit la remontée à pied au parking amont est très courte.+ D'infos Nico 0618522515 (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/250/observations.html>)
