Summary: (machine translated) Narrow forest gorge, mostly no water flow.		
Hydrology:		
Access: (machine translated) From the A 1 (Florence - Rome) at the Fabro exit (23.5 km north of the Orvieto exit) turn east to Fabro Scala, from there continue towards Parrano. About 5 km after leaving the A1, the road crosses a stream. Just after the bridge we follow the signpost 'Tane del Diavolo' on a dirt road that takes us (finally over a small bridge) to the parking area at the exit of the canyon. There you will find a wooden house where the via ferrata is 'managed' through the canyon		
Approach: (machine translated) We cross the creek below the large final stump, leaving the water catchment on the right and climb the footpath in a northerly direction. We come to a wire mesh fence with a locked door. Either we open this door by paying a fee for the via ferrata or we crawl under the fence (above or below the door) as inconspicuously as possible. There is actually no fee for canyoning through the canyon. We follow the trail uphill inside the fence, leaving the access to the via ferrata (at the natural arch) to the right, and reach the upper part of the fence on increasingly sparse tracks. Again through the bottom, then directly along the fence to the right slightly downhill until after about 200m in the fence a gap opens up. Through the gap in an easterly direction to the stream, which we enter just below the small dam.		
Tour: (machine translated) If possible before mid-May when water flow is desired.		
Return: (machine translated) After the exit of the canyon and the last big pool fed by a karst spring, out to the parking lot.
