Summary: (machine translated) Final section of the Rio di Menta, aquatic, technically demanding, great ambience.		
Hydrology:		
Access: (machine translated) We leave the SS 33 (Gravellona - Domodossola), which goes up the Ossola valley, through the Villadossola exit, we cross the Toce river first in an easterly direction, after 2.8 km we reach the village of Beura, here we turn left and after another 1.5 km we reach the village of Quarata. Here we take Via Quarata to the right and park the car near the stream.		
Approach: (machine translated) On the road a few hundred meters north, before reaching the hamlet of Cosa, the trail branches off to the right and climbs steeply to San Lorenzo. Pass the chapel on the left, then turn right at the next fork and reach the ruins of the hamlet of Mura. We have now reached the canyon rim and follow the red arrows on a partly thorny path down to the stone bridge over the stream.		
Tour: (machine translated) At the beginning it is first necessary to overcome a stone chaos. Then follow 2 rappels to the mouth of the left side stream Focia. Now begins a constant alternation of rappels, jumps, slides and of course downclimbing. Technically demanding is then a handrail on the steep rock to avoid a descent in the beam at C 25. After a few narrow passages, you finally rope into the swimming pool of the village of Quarata.		
Return: (machine translated) From the pool to the car.

Parked right below and approach in 1h15, the passage starting from Mura ruins is not always evident at the beginning. Medium/low water level but not to be underestimated on some passages. Anchor points various, quite everywhere double and just missing on some minor pitches that require attention cause very slippery, in particular in the final part where the rock turns greenish starting from water capture. Pay attention to rope recovery cause in a pair of pitches it can get easily stuck. Unluckily second pool still with the dead animal on one side, but with the flow water is cristal clear everywhere else. Wonderful canyon and really waiting to do the overall Menta.

Automatisch importiert von Descente-Canyon.com für Canyon Ogliana di Quarata Marche d approche facile avec un GPS. En arrivant à Mura ne pas descendre des le point de vue mais traverser les quelques ruines.Carcasse de cerf en décomposition dans la c17. Beaucoup de ressauts se desescaladent en opposition avec ce niveau d eau. Attention au ressaut avec l enorme tronc de châtaignier coincé dans la faille : pas d équipement, ça passe en opposition avec ce niveau. Super beautifully cut gorge, can be very difficult with too much water! A transverse passage difficult to master! (machine translated)
