

Boggera (Superiore)

Boggera, Cresciano Superiore, Cresciano

Create: 2023-03-09 20:53:59	Update: 2024-09-13 17:41:57	Print: 2024-12-22 04:12:14
Country: Schweiz / Switzerland Region: Kanton Tessin / Cantone Ticino Subregion: Bezirk Riviera Town: Cresciano		
Difficulty: a little difficult	Grading: v4 a3 IV	Total time: 7h5
Approachtime: 45min	Tourtime: 6h	Returntime: 20min
Altitude entry: 1030m	Altitude exit: 480m	Delta Altitude: 550m
Canyon length: 1400m	Highest rapell: 35m	Amount rapells: 35
Transport: Car optional	Rock type: granite	drainage area: km ²
Season: May - September	Orientation: West	Best Time: 9-12 o clock
Rating: ★ 4.3 (11)	Info: ★ 2.8 (10)	Belay: ★ 2.7 (10)
Specialities:		
Gear: Ropes: 2x 40m		
Summary: (machine translated) Above great, in the lower third then somewhat less spectacular. Clean water; very long tour (start early); countless pools that can be jumped or slid very often; caution even with little water because the pools are very deep and cut out and the exit can be fatal; some places are bypassable; beautiful granite rock, some emergency exits. Helicanyoning possible. Water drainage above		
Hydrology: Das mittlere Drittel von Boggera superior ist im Sommer meist trocken oder hat eine sehr schlechte Wasserqualität (braun und mit vielen Fliegen). Prüfen Sie die jüngsten Niederschläge. Die folgenden Angaben sind ein Anhaltspunkt: <20mm: Nicht genug 50 mm: Nächster Tag 100mm: Sobald der Pegel am letzten Inferior-Wasserfall sinkt, dann gut für 2-3 Tage. So finden Sie die Niederschlagsaufzeichnungen: App „MeteoSchweiz“, runterscrollen bis „Messungen“, Liste (Icon oben rechts), Biasca, Regen (Icon unten), rechts scrollen bis 72h.		
Access: (machine translated) Approach Normal: On the road n.2 coming from the south, shortly after Honda dealer, turn right through an underpass of the railroad line, immediately after that turn right again on gravel road, still about 100m to the parking lot. At the level of the canyon exit there is also the railroad station "Stazione Osonga-Cresciano". Heli approach: From Biasca ri. Osogna --> 500m north before the road leading to Lodrino turn left and drive under the drawbridge --> continue to the right for about 200m until you reach the riding arena --> park the 1st car here --> take the 2nd car and drive to the Heli-TV station. The helicopter can carry 4 people --> the cost of the flight to the entry for the Boggera Superiore is 182CHF (about €135,-) --> very worthwhile!		

Approach: (machine translated)

Ascent from the lower parking lot (2h) or via the toll road (5 CHF) to Censo and from there via a hiking trail (45 min). For description see literature/Swisstopo.

Heli:

After landing with the helicopter, go left along a hiking trail past a suspension bridge to a water catchment here most of the water is diverted. Do not enter too early: the uppermost, normally water-bearing part is not drilled.

Tour: (machine translated)

The entry is chosen over the steep forest terrain --> arrived in the canyon it starts immediately with the first deep pools --> depending on the water level most of the pools jumpable --> continuously it continues over the most beautiful granite rock --> the stands are well attached, but mostly only single hooks --> watch out for the sharp edges and narrow crevasses (several rope remnants in various places already show unfortunate rope withdrawal maneuvers) --> from the middle there are then several rappels that also increase in height --> but there are also always pools and downclimb passages that require concentration and condition --> in the lower part you can enjoy beautiful views from the rappels that offer here up to 35m --> after the last rappel of approx. 18m (jump?!) you mostly meet civilization again --> here is the exit (480Hm) or entry of the Boggera Inferiore --> either you continue to follow the course of the gorge (see Boggera inferiore) or you go left along the hiking trail in about 15min back to the parking lot.

Return: (machine translated)

Leave the canyon at 480m on the left and return to the parking lot via the hiking trail in about 15 minutes, or do the lower part of the canyon (75 minutes).

Reports:

2024-10-03 | Jackcachpot | ★★★★★ | 📖★★ | 📍★★ | 🌊 Low | 🟢 Completed

Little water, but from the dam onwards. Everything jumped or slid that is jumpable according to the Nizzola guide. (machine translated)

2024-09-07 | Pepijn Hoeksema | ★★★★★ | 📖★★★★ | 📍★★ | 🌊 Low | 🟢 Completed

Thanks to Heli TV for dropping us off at the top of the canyon. We immediately entered the stream. This part was really fun. But after a few obstacles, all the water disappears at the intake. After that, the canyon is dry. Some pools smell bad, and there is one pool where climbing out is quite difficult. Other than that, the gorge is very beautiful. Upon reaching the lower section, there's some water again. This section is also nicely sunny in the afternoon. We took 8.5 hours to complete the route (Upper and lower section), with a team of 4 at a relaxed pace. We had two experienced people and two beginners.

Automatisch importiert von Descente-Canyon.com für Canyon Cresciano (supérieur) Essayé de faire le canyon, on a du quite après quelques vasques parce que l'eau disparu et les vasques deviennent trop bas (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2663/observations.html>)

2024-08-10 | System User | 📖 | 📍 | |

Automatisch importiert von Schlucht.ch für Canyon Boggera superiore / Cresciano, Wasserstand: "Wenig" Verankerungen: "Tip top" Mausefalle voll ausgebildet, knackige Kletterstelle! (Quelle: <https://schlucht.ch/schluchten-der-schweiz-liste/1083-boggera-superiore-cresciano>)

2024-08-09 | Jan Grundheber | ★★★★★ | 📖★★★★ | 📍★★★ | 🌊 Low | 🟢 Completed

Very beautiful canyon After the thunderstorm the day before yesterday, there was some water flowing at the top and hardly any at the bottom. But many slides and jumps were still doable. One pool in the upper quarter is empty! (See photo) (machine translated)

2024-08-03 | System User | 📖 | 📍 | 🌊 Dry | 🚫 Not done

Automatisch importiert von Descente-Canyon.com für Canyon Cresciano (supérieur) Attention devient sec après un quart. Une vasque où il manque 3 mètres d'eau est piègeuse. Il faut grimper pour en sortir. A ne pas faire avant des pluies conséquentes. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2663/observations.html>)

2024-08-03 | Patoche67 | 📖 | 📍 | 🌊 Dry | 🚧 Emergency exit

Please note. Don't do the upper part at the moment. After a quarter, it's completely dry, with a trap basin where you have to climb to get out. We got out as best we could! (machine translated)

2024-07-31 | SandroS | ★★★★★ | 📖 | 📍★ | 🌊 Low | 🟢 Completed

In the upper part at times no water flow/dry and some pools with smelly water. (machine translated)

2024-07-14 | System User | 📖 | 📍 | 🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Cresciano (supérieur) Longue et belle course continue, nous avons eu la chance de le parcourir en eau. Le canyon est beaucoup moins ludique en supérieur que la partie inférieure, les rappels sont vraiment glissants et le canyon manque un poil d'encaissement pour être
