

Lasino

Lasino Sup. + med. + inf., Rio Lasino, Lasino superior + intermedio + inferiore

Create: 2023-03-09 20:54:13	Update: 2024-07-06 22:41:39	Print: 2024-12-22 06:12:13
Country: Italia / Italy Region: Piemonte Subregion: Verbano-Cusio-Ossola Town: Ronchi		
Difficulty: difficult	Grading: v5 a2 II	Total time: 5h40
Approachtime: 40min	Tourtime: 5h	Returntime: 0min
Altitude entry: 1340m	Altitude exit: 720m	Delta Altitude: 620m
Canyon length: 500m	Highest rapell: 52m	Amount rapells: 35
Transport: on Foot	Rock type:	drainage area: km ²
Season:	Orientation: South	Best Time:
Rating: ★ 4.3 (7)	Info: ★ 2.5 (4)	Belay: ★ 3 (4)
Specialities:		
Gear: Ropes: 1x60m + 1x50m		
Summary: (machine translated) There are 3 parts, where if you have time it is definitely recommended to do all 3 parts. The middle and lower are intensively commercialized. Nice, continuous, technical rappel canyon in gneiss rock; southern exposure; several emergency exits/escape possibilities, especially in the lower part; well set up; belay stations often placed exposed; fun slides; clean water; on sunny days a 3mm neoprene is enough.		
Hydrology:		
Access: (machine translated) From Domodossola South take the SS33 main road towards Milano. Then take the Piedimulera/Vogagna/Pallenzano exit. At the 1st traffic circle turn left towards Vogagna. At the next traffic circle turn right towards Piedimulera and at the 3rd traffic circle go straight on. Then keep right towards Macugnaga. From here follow the mountain road until just after the village of Vanzone San Carlo. Here on the left there is a large turnout where you can park your car. If you follow the road a few meters further, you can check the final waterfall/water level at the bridge/chapel.		
Approach: (machine translated) The access paths are well marked on the information board at the exit. Caution on many maps (also OSM) are as of 2023 paths badly or incorrectly drawn; those on the board fit well and the accesses are currently also well signposted. Access upper part: Follow the path or the signs until you reach the houses Alpe Briga; hike past them uphill until you see a large conspicuous tree with a large stone. Standing by the tree, you can see another stone in the direction of the canyon on the lower right at the meadows / bushes transition. There begins a path which leads directly to the dam > beginning upper part. Old description intermedio: From the parking lot, walk back about 50 meters to the single house on the hill. After the steps, follow the access road uphill, always following the power line, until you reach the small village of Ronchi Dentro. Here you climb up the wall. Then find your way through the stone houses until you reach the small parking area with the hiking sign Rifugio Tavernetta/Passo Valleretto. From here you follow the trail markings further up. The path goes behind the small group of houses to the left, then past a chapel and finally into the woods. At the yellow sign Pizzo San Martino (after about 20min) you no longer follow the red/white/red hiking trail markings, but take the path with the red markings to the left. This path leads past old stone houses/ruins and over a ridge steeply uphill. After about 35min, at about 960m, there is a red "Y-marking" on the rock. Here you follow the path to the left (! slippery foliage!). After a last small step you reach the stream / entry of the Rio Lasino intermedio at 990m.		

Tour: (machine translated)

For the upper part of the dam left about 1 min climb down to the first stand. Great now well renovated tour in the upper part

Description from intermedio:

The descent begins with the entry into a relatively narrow chute. 11 rappels follow until the exit after this sporty part (810m altitude).\n\nin the lower part again 5 rappels in open terrain. Before the road bridge exit to the right (720m altitude).

The Lasino is an open rappel canyon with mostly little water. But this should not mean that the technical passages, especially in the intermedio, should be underestimated. The canyon has been set up very well, there are enough glue/drill hooks for rope railing to get to exposed belay stations. Arriving at the entry of the Intermedio, we immediately start with a 30m rappel. This is followed by the next rappel. The highest point (50m) is reached in the middle of the Lasino intermedio (the belaystation is reached by a removable rope traverse on the left side). After the high rappel point there is a small step (approx. 10m), then a fun slide. A cascade of 2x20m follows before a huge boulder blocks the way. Here you will find a small passage with pitons to overcome the slippery 3m. After that, the canyon becomes more open and less technical. Here begins the lower part (Lasino inferiore). Several rappels into beautiful green shimmering pools follow with another casual slide towards the exit. After the slide comes a small rappel, a short downclimb / walking passage and the 30m final rappel (because of thorny bushes better rappel left in the water!) The tour ends before the stone bridge / road bridge at 730m.

Return: (machine translated)

The tour ends just before the main road. Take the path on the right (left leads to private land).

If you want you can also go further; there were a few rappel more drilled that you can rappel to the next road.

Automatisch importiert von Descente-Canyon.com für Canyon Lasino (supérieure) Au panneau au dessus du village de Ronchi il est possible de suivre soit à gauche vers "Rio Lasino Intermedio" (la description dans la fiche canyon), soit à droite vers "Rio Lasino Superiore" (GR vers Alpe Briga/ Pizzo San Martino). Le deuxième chemin est plus facile mais présente un dénivelé de 100m de plus. Les deux sont des choix valables.
