| Summary: (machine translated) Short but entertaining forest canyon | | |
| Hydrology: | | |
| Access: (machine translated) In Geneva we get (after the border) on the highway A 40 (Autoroute Blanche) in the direction of Lyon. On this we drive about 75 km. We come to an interchange and continue for another 9 km in the direction of Lyon (A 42). Then we leave the highway and drive to Amberieu-en-Bugey. When we reach the outskirts of the city, we turn right onto the D 1075 (formerly N 75).\nThis road, after we have driven about 2 km in a southwesterly direction, turns left at an elaborate junction in an easterly direction (straight ahead is the D 1084). We drive about 7.5 km, finally in a southerly direction, west past the village of Lagnieu. Immediately before the bridge over the Rhone we turn left on the D 19 and drive on the orographic (!) right bank of the Rhone via Sault-Brénaz to Serrières-de-Briord (about 15 km from the Rhone bridge).\nA few meters before this village we turn left uphill on the D 32 and after witeren 4 km we reach the village Bénonces. In the village, we turn right from the D 32 onto the D 87 in the direction of Seillonnaz. We pass the hamlet of Onglas and a few hundred meters later we come to the road bridge over "our" brook. Park the car here. | | |
| Approach: (machine translated) Above the bridge from the orographic. right side into the stream. | | |
| Tour: (machine translated) Short, but rewarding; suitable to "fill up" a broken day (in the immediate vicinity the canyons Trefon-Pernaz, Cascades du Luizet).\nThe belay for the last rappel is about 5 m back on a rock.\nProhibited in the month of August, as well as each from November 1 to April 14, as well as in the creek area below the described descent. | | |
| Return: (machine translated) Either leave ropes hanging in the Kleinschlucht and return here (can also be done without shunt and hand ascender) or at the exit of the ascent left up the slope above the Kleinschlucht on clear tracks back to the streambed above the Kleinschlucht. | | |
| Coordinates: Canyon Start 45.8176 5.4922 Parking Entry and Exit 45.8177 5.4921 Canyon End 45.8155 5.4887 | | |

Automatisch importiert von Descente-Canyon.com für Canyon Arodin Court, mais esthétique ! À faire en complément d'un autre canyon, ou pour la découverte de la pratique. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/221/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Arodin Effectivement court mais très sympa en complément de Tréfond. Merci pour la main courante en sortie, ça facilite la vie! :-) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/221/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Arodin J'ai équipé une main courante fixe pour sortir du canyon à la fin du deuxième encaissement tout de suite en rive droite. Suivre le marquage jusqu'à la clôture puis suivre la clôture à droite (au début en bordure du champ puis en forêt) jusqu'à retrouver la route. Max 15min (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/221/observations.html>)

2024-04-17 | System User | |📖|📌|🌊 Normal |🚫 Not done

Automatisch importiert von Descente-Canyon.com für Canyon Arodin DC + aujourd'hui, malheureusement j'avais pas le matos. Je suis retourné faire un peu le ménage dans le chemin de retour. A la sortie du dernier encaissement, il faut tout de suite prendre à droite par un petit pas d'escalade, le panneau est toujours là sur un arbre en hauteur puis suivre les marquages bleu. Si vous avez un vieux bout de corde qui traîne pour sécuriser le pas d'escalade en fixe, ça serait top pour ceux qui sont pas à l'aise. La végétation abonde sur la sente de montée mais ça passe encore bien (j'ai remis 2 ou 3 coup de machette). Sinon je pense que le canyon est top dans ces conditions. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/221/observations.html>)
