Ropes: 1x30m

Summary: (machine translated)

Canyon with friendly ambience and fun factor

Hydrology:

<http://www.redhidrosurmedioambiente.es/saih/mapa/tiempo/real/subsistema/iii> (Rio Verde Cazulas)

Access: (machine translated)

In Almuñecar, at the traffic circle, leave the N 340 from Málaga to Almería and turn towards Otivar. Go through Otivar and continue on the main road towards Granada. Shortly after Otivar, the road to Lentegí branches off to the right. Continue straight here, in a left turn over the Rio Lentegí and in hairpin bends higher. 3.3 km after the Lentegí turnoff, a road descends to the left, signposted Central de Cázulas. Continue straight on the main road and one kilometer further turn left through a metal gate set back from the road about 10 meters onto a wide dust road (signposted Proprieta Privada, Junta de los Rios). This access is subject to toll (2016: 5 euros per car, 5 euros per person) Tel.on site: 680493629 or 680493607; best (out of season, otherwise cashier's booth occupied) not to call first when you are there, because cashier needs up to half an hour for the approach. The access and return is possible in the time of 8.30 - 19.00; Mondays no access here. At the entrance gate, set the trip meter to zero. At km 1,2 in a right turn further down to the right, at km 2,5 at a junction straight ahead towards the clearly visible canyon exit. At km 2,6 you cross a (hopefully open) metal gate, at the next junction straight on towards the canyon exit. Cross a bridge and follow the orographic right bank between the (mostly dry) stream and the rock wall until shortly before the exit at km 6.5 a large parking area appears on the left behind a tree. Park the car here.

Approach: (machine translated)

From the parking lot, continue up the slope to the large gravel area above the dam, where two streams join. The orographic left stream is the Rio Verde. Cross the stream above the dam, enter the valley of the Rio Verde, cross the Rio Verde immediately to the right bank and find a wide path that leads upstream. It crosses the Rio Verde on a suspension bridge after about 200 m, climbs up the opposite bank, and then continues horizontally high above the canyons. Passing viewing platforms, the trail descends again to the stream, almost unrecognizable along the left bank upstream, then crossing the stream three more times on bridges on the right bank further upstream. Now the path turns away from the stream and climbs up to the left in a valley basin. In about 20 minutes you reach a horizontally passing almost completely overgrown track, on which you continue to the right. Soon you will see the waterfalls of the Barranco de Funes in front of you and the path descends steadily to the stream. For a longer and more rewarding trip, cross the stream and climb up the opposite bank on the wide path that flattens out after a leftward hairpin bend. Continue upstream on this path, past the striking waterfalls of Barranco de Funes on the opposite side, until a path branches off to the left. Continue straight on this path until it crosses the stream, which has now become somewhat thin. Here is the entry.

Tour: (machine translated)

7 rappel. Beautiful, not very high tuff waterfalls. At the first suspension bridge seen from the access, jumps of 7-14 m into a deep pool are possible. The 14 m jump is located to the right of the orographic left ascending path.

Return: (machine translated)

After the narrow 12 m waterfall, you can see the path on which we climbed the side valley to the slope during the access. After a few pools return to the access path or continue in the streambed to the first suspension bridge seen from below. Here from the streambed to the right up on the path.

Automatisch importiert von Descente-Canyon.com für Canyon Verde DC - , Rando aquatique avec des sauts, retour assez long. Eviter de le faire sous le cagnard, sinon horrible retour... (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2541/observations.html>)

2023-11-14 | System User | |📖|📌|🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Verde Accès par le haut. La piste ne passe pas si bien qu'espéré et on a dû marcher plus longtemps. Plusieurs panneaux de réglementation. Il faut demander l'autorisation mais à qui? On a rien compris. Le canyon est beau mais pas aussi exceptionnel que décrit. Équipement parfait. Il faut bien faire l'intégrale jusqu'au barrage sinon on loupé du très beau. Pour le retour. On a tenté un sentier en rive droite visible sur les carte gps mais on s'est retrouvé face à un mur de végétation piquante. On est remonté par le sentier le long du canyon en jusqu'au milieu puis raide en rive droite. La marche de retour calme un peu quand même. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2541/observations.html>)
