<b>Specialities:</b> Glacier in drainage area,		
<b>Gear:</b> drill tool,		
<b>Summary:</b> (machine translated) Narrow, high alpine rappel canyon with many natural stone arches. There is even a rappel from one of the arches. Almost dry in the upper part in summer, little water in the lower part. Can be dangerous during glacier melt or thunderstorms due to the narrow sections.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) Drive from Bormio in the direction of the Stelvio Pass. After a few tunnels, leave a car in the parking lot on the left before a small bridge. Due to the heavy traffic, a shuttle with a second car is recommended. Continue for 10 hairpin bends until you come to another large gravel parking place on the left.		
<b>Approach:</b> (machine translated) From the parking lot, an initially steep hiking trail begins opposite, which you follow in a south-easterly direction. At a junction, take the left-hand variant until you reach a small lake (Lago del Mot). After approx. 200m, turn right into the streambed, where you can clearly see the entry to the first part of the canyon.		
<b>Tour:</b> (machine translated) Several very narrow, dark gulches with numerous rock arches separated by more open parts where you can easily get out. This is followed by a longer walk and downclimb with some water. In the final part, which is no longer so narrowly cut, there are about 10 more rappels.		
<b>Return:</b> (machine translated) After the last rappel, you can already see the parking lot and come directly to the road on the left.

<b>Reports:</b>		
2023-08-06   Patrick Summerer   ★★★★★   📖★★★★   ⚓★★★   🌊 Low   🍏 Completed All hooks are not redundant (express anchor + rings), but well placed without edges. A few small abseiling places. The weather can change very quickly due to the alpine location, with us it has briefly started to snow sleet, half an hour later it was sunny again. (machine translated)
