Summary: (machine translated) Forest canyon for rappel.		
Hydrology:		
Access: (machine translated) Coming from Rome, we leave the A1 by the Ceprano exit. From Ceprano we take the N 6 to Arce (7 km) and continue towards Santopadre. A few hundred meters before reaching this village we turn left at an acute angle towards Fontana Liri. 2 km further on we turn right and immediately left again onto Via Casale (signpost 'Loc. Santo Spirito'). About 1500 m further on we leave the lower vehicle at the bridge. With the second one we go back and up until we turn left about 150m before reaching the road Arce - Santopadre and descend in serpentine through the woods to the bridge (upper parking lot).		
Approach: (machine translated) Below the bridge into the stream.		
Tour: (machine translated) The Santopadre is worthwhile only with sufficient water flow, if you can jump the final pumps. Water flow at the entry does not guarantee water flow from the middle of the canyon. \nIf the final pumps are not full - marmita trampa!		
Return: (machine translated) At the small bridge on the right we take the slope to the road.		
Coordinates: Canyon Start 41.6100 13.6141 Canyon End 41.6157 13.6019
