Summary: (machine translated) Very nice varied water-bearing canyon; some deep pools; clean water; several jumps and slides; several escapes but very heavy vegetation; at the end 20min. River walk; large catchment area; very well equipped inox stands; watch out for sand otter/ European horned otter.		
Hydrology:		
Access: (machine translated) From the town of Bar at the traffic circle turn left towards Ulcinj/Skadar. At the next traffic circle turn right towards Ulcinj/Skadar. Cross 2 traffic lights and at the next roundabout 3rd exit direction Ulcinj. Then at the traffic circle turn right towards Ulcinj. Through the village Zaljev. Turn left towards Ostros and drive up the mountain road. After 9.7Km turn left towards Dabezići (tree in the middle of the road fork). Continue here keeping left. Follow the marker for Markezici/Kelezići. First cross the bridge and then turn right towards Medurec. After a short distance, park the shuttle car at the gravel parking on the right. With the second car, continue along the narrow mountain road from Medurec (first asphalt, then gravel). The second car is parked after about 3 km at the highest point, before the road leads down.		
Approach: (machine translated) approx. 15min/ 1h From the parking at about 690m with a beautiful view of the mountain landscape of Medurec, follow the sloping mountain road for about 100m. Here you look for a trail marking on the left which you then follow steeply downhill through the sparse forest. A little further down you meet a second path (access path) which you follow to the right. After a few meters you will come to a thin tree with red color markings. Here you descend directly to the stream / entry at about 560m.		
Tour: (machine translated) The canyon is certainly one of the most beautiful tours in Montenegro and offers everything you could hope for from a casual canyoning tour. Right at the beginning comes the highest step. Here you rappel about 30m to the first beautiful depth pool (possibly 2/3 slippery). Without a long way further beautiful pools and steps follow up to max. 20m in which one rappels, jumps or slides. After the last cascade of about 20m and 5m, which with a lot of skill, are also jumpable, follows a 20 min. river walk to the exit on the left at about 330m. Small tip: As an indicator for the normal water level serve three washed over square boxes at the concrete stream crossing at the exit (access possible).		

Return: (machine translated)

approx. 10-15min

At about 330m at the concrete stream crossing you leave the stream on the left side. First the path leads over a gravel road which then meets the asphalted Medurec mountain road. Follow the road downhill until you reach the parking exit.

The super-nice Ahmed (broken English, otherwise BKS) from the village next door shuttled us to the entry for 20 euros, as we only had one car. According to his own information, he does this several times a day, so he's certainly happy to see more passengers ☺ The canyon itself was a dream, we walked it comfortably in a little under 2 hours. Rocks with good grip almost everywhere, some slides and jumpables Single hooks everywhere, even a chain anchor in two or three places Don't follow the misleading red marked exit on the left ;) (machine translated)

After a heavy thunderstorm yesterday, the canyon had a nice, comfortable water level today. We were geocache hunting through the canyon in a leisurely 1h50. (machine translated)

The narrow, steep access road has now been asphalted. For the way back you can get off orog. right after a wooden bridge and follow the path to a meadow. After the meadow, the widening path winds back towards the stream. Cross the stream at the ford where you meet the described way back. (machine translated)
