Summary: (machine translated) Unfortunately very crowded (high summer); short but very beautiful canyon; grippy limestone; several bottlenecks and climbing; small siphon; clean water; few short rappels; diving goggles and lamp advantageous; very aquatic canyon.		
Hydrology:		
Access: (machine translated) approx. 15min From the village Rodellar: ri. Huesca --> past the outdoor club (on the left side of the road) --> through the small town (Bierge) --> continue up the road --> to the hill of the Barranco Fondo (signposting + viewpoint) --> here strongly left. the gravel road about 1.6Km along --> parking at the exit of the road.		
Approach: (machine translated) approx. 45min From the parking lot, follow the gravel road --> pass a barrier and continue up to a trail marking (Steinmandl+ signs) --> here take the path to the right and walk across the boulder field --> after about 20min. If you reach a vantage point --> keep to the left and you will come to the descent path that leads in about 25-30min. over the steep boulder field to the entry --> arrived at the creek you walk on the right side of the creek to the entry.		
Tour: (machine translated) approx. 1-2h After a short swimming passage follows a mighty rock labyrinth in which one first rappels, then climbs down and swims (problematic with a lot of water)--> the mighty wedged limestone rocks are very impressive --> after the rock chaos a very narrow section follows, part only 1m wide section with high rock walls where the light is very sparse (very nice part) --> in this part is also a swimming section and a slide in very dark pools (attention very narrow) --> further on you come to a small abseil in a slowly rising pool. abseil in a slowly opening canyon --> swimming passage --> climbing over small rock chaos --> at the end there is a swimming passage of about 100m --> the exit is on the right (after a small iron plate bridge).		
Return: (machine translated) approx. 30min On the right side, hike up the clearly visible trail next to the wooden railings to the parking lot.

Relatively much water flow for the time of year. Siphon dived through instead of rock climbed over. Partly unusually slippery. (machine translated)

A fascinating canyon. You simply have to have done a canyoning tour here. Video of the tour:
