<b>Summary:</b> (machine translated) Beautiful rappel canyon. Can be easily combined with Ciorosolin, Stuet or Ciol dela Meda. Was completely renovated on 9.6.2023 for the Raduno Regionale. Nevertheless, you should always have an emergency drill kit with you, as the stream can carry massive debris and repeatedly tear away stands. The entry to the canyon is via a side stream with an abseil point before you reach the confluence with the Ciol del Pes (highest waterfall 50m). Beautiful abseils, some directly in the water.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From Claut drive into Val Sentimana for about 30 minutes. Pass the parking lot of Ciorosolin. The final waterfall of Ciol del Pes is visible from the road and is the same as for Ciol de la Meda. Be careful when entering Val Sentimana! Depending on the time of year and the day, you may have to pay to enter the valley (this is checked).		
<b>Approach:</b> (machine translated) CAI trail no. 366 begins on the orographic left side of the waterfall (directly at the parking lot; sign C.ra Pramaggiore). Follow the path until you reach a fork after about 35 minutes. Turn left here (signpost: C.ra Pramaggiore) and walk downhill for a further 10 minutes until you reach the tributary of the Ciol del Pes. This is where the tour begins.		
<b>Tour:</b> (machine translated) In the tributary of the Ciol del Pes there is a rappel (approx. 30m), followed by the confluence with the Ciol del Pes. There are 2 ways to rappel here. Either stay with the tributary and over a rope traverse to the chain anchor and then rappel the 50m, or downclimb into the Ciol del Pes and rappel from there. This is followed by several abseils in a narrower gorge area before it becomes more open again. Beautiful tour with some rappels in the water.		
<b>Return:</b> (machine translated) Walk 3 min to the parking lot.

Good water level, on the 2nd rappel after the confluence we used a floating anchor for safety, so that you don't get in at the bottom at the water level (machine translated)

All anchors ok, flow still very nice for the time of year, things get interesting from the 2nd abseil with some beautiful longer ones. To complete the day with nearby canyons.
