Summary: (machine translated) Fun Canyon		
Hydrology:		
Access: (machine translated) From Grenoble on the new A 51 southward in the direction of Sisteron (or via N 75) to Monestier-de-Clermont (approx. 35 km). From the northern edge of the town, take the D 8 to St. Guillaume (6.5 km). From here, continue on the D 242 in the direction of St. Andeol. After about 1 km, we come to the bridge (Pont de la Massette) that spans the little river Gresse. Before the bridge the track on the left and after about 100m we come to a small electric plant. Park the first vehicle near here. With the second back to the bridge and up to St. Andeol, we pass through the village and a few meters after the end of the village we come to a road that leads down to the left to the hamlet of Chazeaux. Just at the beginning of this road, a parking lot is designated on the right in the meadow for the gorges (2009). If you come by motorhome, you will find a designated overnight spot with a water tap by continuing on the main road for another hundred meters or so, then turn left.		
Approach: (machine translated) We hike through the hamlet of Chazeaux and follow the track that descends and crosses a side stream of the Berrière at the edge of the forest. We follow the tracks downhill on the right bank of the side stream, later we come across a slightly wider track and follow it until we see the Berrière and can descend to the streambed. From the camper site approach according to Wikiloc link.		
Tour: (machine translated) Well-frequented canyon with two quite different parts (first small-scale gorge, later rappel canyon) connected by a relatively long passage, where at times you walk on paths on the edge of the stream. An existing contamination is recognizable by the smell. Some jumps and a slide possible at the exit of the tour.		
Return: (machine translated) After the prominent double step with the final high slide out to the right and on clear tracks down to the Gresse, cross this and to the vehicle at the E-Werk. Here also toilet.

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Descenso con caudal correcto. Se hecha de menos algo más de instalación de progresión, después de la construcción de la nueva central hidroeléctrica. Pero es un barranco precioso!! Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Attention au T10 accident ce jour. Un corde jusqu'au milieu n'est pas de trop. Équipement MC pour la D7 ok mais vieillissant. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Parfait, même un peu sou côté je trouve. Après les travaux de construction de la micro centrale ont un peu changé la physionomie de la fin, un passage sous bloc paraît avoir disparu et les gravats de la piste ont un impact rive gauche.....Un grand merci à la sympathique famille qui a accepté de faire la navette pour nous :) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Tous les sauts passent sans soucis, juste bien amortir le toboggan final (4-5m de cordes suffisent)△pour info, panneau d'interdiction du canyon du 18/09 au 30/09 inclus. (Weekend partie haute autorisée apparemment) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières RàS. Parcouru à 7 en partant avant midi. Les groupes sont arrivés après. Ambiance extra dans la C17 très encaissée. Après, je trouve que la prise d'eau coupe un peu l'ambiance, heureusement que les deux dernières vasques valent le coup (saut 10m OK et tobo' 9m qui dépose OK avec amorti). Automatisch importiert von Descente-Canyon.com für Canyon Moules Marinières Ras, nouveau barrage après la c17, perso nous avons pris l'échelle et descendu dans l'eau juste après ce barrage. Pour les 2 derniers obstacles, le saut passe et le toboggan, nous l'avons fait du 2/3 en amortissant un peu. (environ 1,50 m d'eau).
