Good big to very big flow. We added an RG point to avoid the suspended basin in the C12+C30 sequence. (machine translated)

All anchors ok, but you have to search a bit. Below the C70 the anchors are RD behind a large block (not rg as in the topographic view). Very rewarding canyon! Don't be fooled by the amount of water you see from the valley (see pictures). The last 3 rappels are below the socket and it looks like very little. The water level at the top is okay. Take 6 CHF for the cable car or Twint. (machine translated)

Phenomenal scenic views. Today with fog in the valley that cleared during the day. Impressive rappel. Absolutely delightful. Anchors OK where you would expect two anchors. No chain anchors. The upper waterfall is the refernce. Then comes the water intake. (machine translated)
