Specialities:		
Gear: Ropes: 2x40m/ 1x20m		
Summary: (machine translated) Dry almost all year round; stale water in pools (stinks!); very slippery; many rappels in mostly small pools; 35m rappel with sharp edge; unfortunately not recommended due to little moving water and silty strong smelling pools; possibly feasible after longer rainy period.		
Hydrology:		
Access: (machine translated) approx. 40min From Torbole ri. Malcesine --> road (249) further along through the village of Brenzone to the small village "Pai" (between Torri del Benaco and Castello di Brenzone) --> there turn left ri. Pai di Sopra (Via Manzoni) --> drive up to the village over cobblestones --> past bar and pizzeria --> ri. Via Ca. Tronconi (dead end) --> after about 1.5Km there is a bridge --> cross it and park at the 2. church iconostasis at about 250Hm (little space for parking).		
Approach: (machine translated) approx. 45min From the parking lot follow the road for 15 min in the direction of Ca Tronconi> over a bridge > past the olive trees to the first group of houses --> after the group of houses immediately to the right up to the next group of houses at about 380Hm --> here also to the right --> follow the stone wall first straight then slightly uphill to the streambed path --> entry at about 490Hm.		
Tour: (machine translated) approx. 3-3,5 After a short walking passages come the first rappel points which are usually 10 to 15m high --> after about 5/6 rappel comes the highest rappel point with about 35m (! Sharp edge!) --> continuously it continues in narrowing canyon over several rappel points that are often up to 20m high --> kl. However, caution is required because the vegetation is everywhere slippery places --> in the last third of the canyon is even narrower and several rappel follow in short intervals to the end --> after the last rappel it goes about small climbing and walking passages about 50m to the exit of the canyon (stone wall).		
Return: (machine translated) approx. 10min At the stone wall on the right you go up over the olive tree slopes --> shortly you meet the access path --> down to the parking lot.

Done a few days after consistent rainfalls. Enjoyable and rather continuous canyon, with 2 escapes we noticed (one before the final waterfall). Anchors are mostly doubled, renewed, a few older ones, but they do the job. Limited parking space, best to come max 1 car.

One day after a heavy rain the pools were clean and even some water was flowing. We did it without wetsuits that was not too bad. Just a tiny bit.

Automatisch importiert von Descente-Canyon.com für Canyon Sandolino Sceso oggi con scorrimento basso. All'ingresso c'era scorrimento, cosa non frequente. Era presente schiuma, segno di un ingrossamento d'acqua recente. Armi tutti ok con catene francesi. 4-5 tuffi tutti fattibili. Uno dei migliori avvicinamenti ed uscite dal canyon. Panorama sul lago strepitoso. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2603/observations.html>)

Dopo 5 giorni di intensa pioggia, acqua presente che rallegra la discesa. Sconsiglio la discesa in periodi secchi, alcuni armi ancora vecchi che andrebbero rifatti. Il punto di ingresso su questa descrizione è errato, quello reale è a quota 380 m slm, uscita 140 m slm. Ambiente con bellissimo informalmente con belle calate e sempre continue. <https://youtu.be/KQwTnsNPYLY?si=KB0b6YxZ2xTOY0WM>
