Summary: (machine translated) Watery canyon with many jumps and slides		
Hydrology:		
Access: (machine translated) Leave the Italian A 10 (Genoa - Nice) at the Arma di Taggia exit (about halfway between Imperia and Ventimiglia). Then take the SP 548 up the valley of the Argentina towards Triora. After 8 km we pass through Badalucco, 12 km after that, just before the village of Molini di Triora, we turn left onto the SP 65 towards Colla Langan. We cross the Argentina and 2 km after the turnoff we reach the first leftward hairpin bend, where we park the car.		
Approach: (machine translated) From the bend in the road we take the footpath that leads in a northerly direction above the Argentina slightly uphill to the dilapidated (2009) footbridge over the Grogcardo. Enter the Grogcardo here (see more details there). Immediately after the exit of the dark gorge (i.e. before the described end of the Grogcardo) follow the tracks up to the left and take the path to the north that goes slightly upwards above the orographic right bank of the Argentina. We arrive at the medieval stone bridge of Ponte di Mauta (540 m a.s.l.) and enter the Argentina above the bridge. Here we come, saving the usual running distance until then, immediately to the first attractive part under the bridge.		
Tour: (machine translated) For Grogcardo cf. there! After the entry under the Ponte di Muota you start with a jump, then you come to the highest step, which you can also manage with jumps. Then a longer run until, at the exit, some optional jumps and the slide into Lago Degno complete the tour.		
Return: (machine translated) Where from the right (west) the Grogcardo flows into a large pool of the Argentina (so-called Lago Degno), at its lower exit first over rock, then follow the track up to the right to the approach path and on this back to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Argentina Quel joyau ce canyon, si seulement il était plus long. On a posé la corde une fois, on a trouvé qu'il manquait de fond pour un saut d'environ 8-9 mètres (à l'endroit où coule une belle veine au milieu de la dalle). Automatisch importiert von Descente-Canyon.com für Canyon Argentina Top condition. Étonnement pour le secteur et bien qu'en bon état, l'équipement n'est pas génial dans ce canyon, les points sont vraiment posés n'importe où. Le dernier toboggan passe sans encombre.
