Country: España / Spain Region: Andalucía / Andalusia Subregion: Granada Town: Otivar		
Difficulty: not as difficult	Grading: v3 a2 II	Total time: 5h
Approachtime: 20min	Tourtime: 4h30	Returntime: 10min
Altitude entry: 895m	Altitude exit: 350m	Delta Altitude: 545m
Canyon length: 6000m	Highest rapell: 25m	Amount rapells: 15
Transport: Car required	Rock type:	drainage area: km ²
Season:	Orientation: South	Best Time:
Rating: ★ 3.1 (2)	Info: ★ 0 ()	Belay: ★ 0 ()
Specialities:		
Gear: Ropes: 2x30m		
Summary: (machine translated) Open rappel canyon		
Hydrology:		
Access: (machine translated) In Almunecar, leave the N340 and head north on the SO2 via Jete and Otivar, past the turnoff for the road to Lenteji to the road bridge (over the Lenteji) in a left-hand bend (14 km from Almunecar). Here park the first vehicle. With the second the road continues and curves above the Rio Verde uphill, past an abandoned gas station at the Mirador de la Cabra Montes and past the board that stands on the access road of the Rio Verde. About 450 meters further on (after the road signs '40' - 'sharp bend' - 'falling rocks'), a dirt road descends to the right. According to Gómez, there should be a survey pylon 'MP 282' here - maybe a bit further on the road towards Granada - but we did not see it. Park the second car at the junction (approx. 13.5 km from the road bridge, approx. 1000 m above sea level).		
Approach: (machine translated) Follow the slope in an easterly direction down to the streambed (up to here also by car if necessary), where you will soon have to overcome a brick slide brake.		
Tour: (machine translated) After overcoming the slide brake, you walk for a long time in the dry riverbed and rappel a few times until you finally encounter flowing water. A short time later the side canyon Palomas opens from the left over a small wall, which - like the Guadajana - can be chosen as an alternative approach (cf. descriptions there). The western neighboring canyon is the Rio Verde (Chorreras) with its headwaters Cortales, Funes and Madronales. Ascent May 2002 integral, exit Oct. 2006 via Guadajana, early Nov. 2009 via Palomas.		
Return: (machine translated) Down in the streambed between the terraces with fruit trees (do not climb out on them - in the finca on the right biting dog and also biting farmer) until you can get out directly on the slope, which then leads to the bridge and the lower vehicle.

Automatisch importiert von Descente-Canyon.com für Canyon Lentejí Accès par guadajana, eau cristalline qui se perd par tronçons et réapparaît plus loin. Pas mal de désescalades possibles. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2542/observations.html>)

2023-12-31 | System User | |📖|📍|🌊 Low |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Lentejí Très joli petit canyon très facile. De beaux paysages, belle nature au calme. Avons commencé par l'affluent Guadajana. On a fait du stop pour montrer au village depuis le parking aval. 30 min d'approche. 2h de canyon. 30 min retour. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2542/observations.html>)

2023-11-15 | System User | |📖|📍|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Lentejí On a pris une entrée plus classique, un peu au dessus du village de lantegi qui amène directement au départ de l'encaissement. Canyon très bien équipé et très jolie. J'ai préféré à Rio Verde. Merci à Emma du club spéléo local pour la navette fortuite. Sans navette depuis le croisement entre la route principale et lantegi, il y a une route secondaire qui coupe et qui est donné pour une heure à pied. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2542/observations.html>)
