<b>Summary:</b> (machine translated) Left tributary of the Lumiei. Rappel canyon, which becomes narrower with increasing duration. Here described exit before joining the Lumiei, but also possible continuation in the Lumiei (additional 2 hours).		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) As for the Lumiei (see there). If you follow the Lumiei walk, leave the lower car at the parking exit of the Lumiei. If you want to get out before the Lumiei, leave the lower car at the parking entry to the Lumiei. Continue with the second car to the bridge over the Lumiei. Park in front of the bridge, as there is little parking space on the other side and it is dangerous to exit onto the road directly at the mouth of the tunnel.		
<b>Approach:</b> (machine translated) Cross the bridge and immediately after it take the forest path to the right (south). Follow the trail until you reach a small power plant access tunnel, which is blocked with an iron gate. Here follow the tracks to the right (somewhat exposed) until you reach a tunnel window that is also barred. Here you come across the first rappel (sling around tree).		
<b>Tour:</b> (machine translated) At the beginning, descend the rockfall-prone flank for about 55m. Intermediate position after about 30m, slightly offset to the left, above a rock wall, over which you rappel another good 30m. Below the rock wall you cross to the left and come in a wide right turn down into the streambed (about 920m a.s.l.). After a short run, the long series of rappels (about 20 in total) begins, leading into an increasingly narrow canyon. Caution: sharp edges on some of the rappels.		
<b>Return:</b> (machine translated) Where the canyon widens decisively, climbing tracks go up on the right, over which one comes to the footbridge over the Lumiei and up to the lower vehicle (if one wants to connect the Lumiei, a nice 20m rappel leads down into the Lumiei at the lower exit of the widening). Alternatively, you can follow the path up to the bridge and then start this tour as in the Lumiei description. In this way you also experience the most impressive part of the Lumiei Gorge.

Automatisch importiert von Descente-Canyon.com für Canyon Novarzza A metà avvicinamento (sentiero molto largo) sono iniziate le sirene dalla diga ed abbiamo nuovamente chiamato i gestori che non sapevano nulla di queste sirene. Nei giorni precedenti ed anche alla mattina dell'escursione abbiamo chiamato i gestori della diga e ci avevano confermato che non aprivano nessuna diga. Canyon non sceso visto le sirene ed il gestore che non sapeva nulla di queste sirene. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21145/observations.html>)

Wortj doing only when there is water. I was also there when it was dry, totally not worth it, but when there is water, tottaly dofferent experience. Nice jumps, beautiful rappels, deep and narrow. 📖 All anchorpoints in good shape.

Automatisch importiert von Descente-Canyon.com für Canyon Novarzza DC+ quite a bit of cold meltwater. At first much gravel but once the rappels start the gravel is gone and the canyon is clean and really nice. Water gets murky quickly (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21145/observations.html>)

Lots of water at the moment and very cold. The canyon itself is very beautiful. Bolts could be better, but still ok. It is recommended to climb up to Lumiei on the right before the final ortographic section. All jumps are doable. (machine translated)

Before the Lumiei still hopped through here, so I can not really inspire me for this gorge -- there is simply missing the water. Stands so far ok (machine translated)
