Summary: (machine translated) Relatively open forest gorge		
Hydrology:		
Access: (machine translated) In Geneva we get (after the border) on the highway A 40 (Autoroute Blanche) in the direction of Lyon. On this we drive about 75 km. We come to an interchange and continue for another 9 km in the direction of Lyon (A 42). Then we leave the highway and drive to Amberieu-en-Bugey. When we reach the outskirts of the city, we turn right onto the D 1075 (formerly N 75). This road, after we have driven about 2 km in a southwesterly direction, turns left at an elaborate junction in an easterly direction (straight ahead is the D 1084). We continue for not quite 8 km and then turn east at a traffic circle to Vaux-en-Bugey. In this village we take the D 60 A in the direction of Cleyzieu. From the center of the village we go straight on for about 4 km in the direction of SSO. Then the road turns to the east. After this change of direction, a dirt road comes up from "our" stream, opposite is a parking bay, where we park the lower vehicle. With the other vehicle we continue; the road now climbs slightly and rapidly gains altitude in some switchbacks. At the top, at a T-junction, we do not turn left to Cleyzieu, but right. After a few hundred meters we reach the road bridge over the stream. Park the upper vehicle here.		
Approach: (machine translated) We go downstream, first the forest path on the orographic left bank, then in the streambed and after a few minutes we come to the first rappel.		
Tour: (machine translated) Not unattractive canyon when water flows. Comparatively open with a longer walking passages on a path on the left bank after the third higher rappel (C 16).		
Return: (machine translated) The exit from the gorge ends at a small brick water intake. From here, take the forest path that initially runs to the left of the stream, later crosses it and reaches the tarred road for the first time at the lower vehicle.
