<b>Summary:</b> (machine translated) Detailed description see <a href="https://alpinesicherheit.com/2018/kuehbach-canyoning-schluchtenfuehrer/">https://alpinesicherheit.com/2018/kuehbach-canyoning-schluchtenfuehrer/</a> Offers itself as an alternative tour, if SababachCanyon does not seem feasible because of too much water flow. The Kühbach rarely carries water from the beginning of the first rappel. It usually seeps away beforehand and does not come to the surface again.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From Reutte drive via Pflach and Unterletzen in the direction of Gasthaus Bärenfalle. From the direction of Füssen on the L69 via Musau. Pass the inn and follow the forest road for a short while until you reach the parking lot for hikers before the first serpentine (875m altitude).		
<b>Approach:</b> (machine translated) Ascend the forest road (Reintalstraße) for about 1300m and at 1055m turn left onto a forest road that leads us almost horizontally to the entry.		
<b>Tour:</b> (machine translated) At first narrow canyon, later descending on open rocky ridges, see videos and photos.		
<b>Return:</b> (machine translated) Once at the bottom, turn left out to the car.

## Reports:

2023-07-29 | Ralf Breitenstein | ★★ | 📖★★ | 📍★★★ | 🌊 Low | 🟢 Completed

Everything in order, sufficient hooks. Water level after previous rains present but still low and not critical. (machine translated)

2023-06-06 | Wolfgang Streicher | ★★ | 📖 | 📍★★★ | | 🟢 Completed

From the beginning of the canyon widening, the pitons were not consistently set in the fall line of the stream. Thus one saw oneself repeatedly forced to longer diagonal ropes. At least one could enjoy a very rare water flow here. (machine translated)

2023-05-26 | Fred | ★★★ | 📖★★ | 📍★★ | 🌊 Normal | 🟢 Completed

Everything in order. hooks in good condition, very many hooks in different places. (machine translated)
