Summary: (machine translated) Impressive and long great canyon without exit possibility.		
Hydrology:		
Access: (machine translated) From Oloron-Sainte-Marie, take the D-919, then the D-918 towards Tardets(-Sorholus). 1 km before reaching the village of Tardets, we join the D-26 and follow it for 13.2 km in a southerly direction (Larrau). Here - 2.6 km before Larrau and next to the "Auberge Logibar" - we park our car in a parking lot for hikers.		
Approach: (machine translated) Here we take the GR 10, which leads in a southerly direction to the Gorges de Holzarte and Olhadubie. We cross the Gorge Olhadubie high up on a suspension bridge. The path now climbs to about 750m above sea level, then branches off. We turn left, following the "Olhadubi" signpost (GR 10 variant). As we continue, we come to the Pont - Brücke - d'Olhabie, see: http://lagarafa.blogspot.com.es/2013/10/barranco-de-olhadubi.html Below the bridge, we climb into the stream.\nYou can also enter further below the bridge (roping in if necessary), quite close to the basin at the beginning of the great canyon.\nSee also https://www.wikiloc.com/canyoneering-trails/aproximacion-andando-barranco-olhadubie-18717898		
Tour: (machine translated) Great canyon with "run-in" and "run-out" (Holzarte). Watery, 24 rappels, underground "lake", no emergency exit from the great canyon, hardly any sunlight.		
Return: (machine translated) Clear footprints on the right bank show us the way to the GR 10, which we follow back to the car.		
Coordinates: Canyon Start 42.9894 -0.9072 Canyon End 43.0152 -0.9267

Automatisch importiert von Descente-Canyon.com für Canyon Olhadubie Fait jusqu'à la passerelle d'Holzarte, et remontée sur corde sous la pluie et un fort vent. Pas si glissant que ça aujourd'hui miw à part la première heure. Beaucoup de troncs récents et de pigeons morts.
