Summary: (machine translated) The best part of this slippery canyon is the surrounding scenery. A "once in a lifetime canyon" if no other presents itself.		
Hydrology:		
Access: (machine translated) From Aleria about 4 km on the N198 north, direction Bastia. Then turn left on the D16, then 17 km to Tox. Continue via Campi, Moita and Matra (up to here 26.7 km from N98). From Matra now 5 km further direction Pianello and we are at the bridge over the Bravona. Here we park our car (775m above sea level).		
Approach: (machine translated) From the road bridge we take a path that leads us up the orographic right bank to the entry above the first rapel (C26 - 825m a.s.l.).		
Tour: (machine translated) First the C26, followed by a C13, then under the Stzaßenbrücke. After 350m in the streambed, it becomes more interesting again. Several rappels follow, including the C35. Finally, the last rapel of importance, the C17. A further descent in the streambed - about to the old footbridge at 545m a.s.l. - is not worthwhile. Instead, get off under the C17 (altitude 610m above sea level).		
Return: (machine translated) To the left, initially pathless up the slope, we later meet a path that goes up above and essentially parallel to the stream. After some time we thus come across a side stream (Ruisseau Nespoli), which we follow uphill to the road (D16). On the road turn left to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Bravone Parking à Pianelluccio. Approche en 1 h en passant par la D16 puis en prenant un sentier qui remonte la rivière en RD jusqu'au sommet de la première cascade. Ce sentier monte et contourne la première cascade (balisage avec des points orange) puis redescend sur la droite au sommet de celle-ci (balisage avec des points jaunes). Descente du canyon en 2 h 45 min. Celui-ci est plutôt bien équipé. Il y a de très beaux passages, mais la marche finale jusqu'à la passerelle (qui n'existe plus) est un peu laborieuse. Remontée en 30 min jusqu'à la voiture par le sentier balisé en RD. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2319/observations.html>)
