Specialities:		
Gear: Ropes: 2x20m		
Summary: (machine translated) Relatively horizontal dark gorge with smaller rappels and possible jumps		
Hydrology:		
Access: (machine translated) We leave the A9 at Sion (whether exit Conthy, Sion-ovest or Sion-est) and take the road up to the Sanetsch reservoir. After some serpentines we pass through Chandolin. A few meters after leaving the village, we see the church of Notre Dame des Corbelins on the left of the road. From here it is another 1.6 km to the parking lot for the lower car, which is visible as such (see Google aerial photo).\n\nWith the second we continue uphill and after about 2km we cross the Morge on the Pont du Diable (905m altitude). After a right serpentine we come to a left serpentine and park the upper car here (see Google aerial photo).\n\nIf you don't have a second car available, 2.2km on foot.\n\nThe access can also be done via the orographic. right slope side of the Morge (Earth, Daillon).		
Approach: (machine translated) From the upper car we go down the slope to the bridge. Just before reaching the bridge, we descend steeply into the stream (handrails).		
Tour: (machine translated) Short walk, then dark gorge with smaller rappels and jumps, or slides. Then the gorge opens, from the right flows the Rogne to and we are already at the exit.		
Return: (machine translated) A small path leads up the left slope to the road (handrails).

Automatisch importiert von Descente-Canyon.com für Canyon Morge Petit DC +. Eau qui se trouble vers le milieu du canyon (eau marron rapidement). Puis de nouveau claire en fin de canyon. Nous avons d'abord cru à un début de crue, mais pas de montée d'eau perceptible... les réchappes étant possibles dans nombres d'endroits vers la fin, nous avons achevé la descente et tout semblait normal. Automatisch importiert von Descente-Canyon.com für Canyon Morge Fait le début dans l'actif.. très sympa même si on rate le saut rive gauche, on peut quand même s'amuser à sauter depuis plus bas. Les sauts passent. Attention sur les tous petits sauts (2-3m) à bien sonder avant, beaucoup de caillasses et de vasques gravées. Les plus hauts passaient bien même le dernier rappel rive gauche avant d'arriver à la sortie. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23209/observations.html>)
