<b>Summary:</b> (machine translated) Short, beautiful tour; be sure to check the water level beforehand; reservoir above; can be done as a single tour or in combination with Vajo dell'Orsa superiore.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) approx. 1h From Torbole --> freeway direction Verona/Affi --> exit at or before Brentino --> drive into the village of Brentino (located above the main road and the water canal) --> in the village follow the road to the right until you reach the old power plant (ENEL) (first asphalt then gravel) --> at the exit of the dead end you will be in front of the iron gate of the beautiful old hydroelectric power plant -->park here (approx. 280Hm).		
<b>Approach:</b> (machine translated) approx. 15min From the ENEL power station via the hiking trail on the left up to the stream --> you can check the water level beforehand at the exit under the key point (clamping block).(clamping block) check (350Hm).		
<b>Tour:</b> (machine translated) approx. 45min You can do the lower part of the Vajo dell'Orsa as a short entry tour or do the very rewarding combination with part 1 (see description Vajo dell'Orsa superiore) --> if you decide to do only the lower part, after a short walking passage you go straight to the 1st rappel. Rappel 10m --> immediately after a 12m place slightly overhanging in deep pools + small jump in the next pool --> after the next 5m step with large pools comes the last rappel --> here can be rappel left from the clamping block to a clear chain anchor or you rappel directly in the water course under the clamping block (!!!rock in the arrival pool!!!) after a short walking passages you leave the canyon right (290Hm).		
<b>Return:</b> (machine translated) About 5min Via the well visible path shortly back to the parking lot at the ENEL power plant.

Together with superiore it is superiore. This canyon is also maximum A3 (machine translated)

2024-08-06 | Peter | ★★☆☆ | 📖★★★ | 📍★★★ | 🌊 High | 🍏 Completed

Two more rappels and two more dives to add to the top. We found about 60 commercial but were let through. (machine translated)

If you have done the superiore, it is a good idea to do the lower part as well. Don't be surprised that the numbering of the AIC is at the exit. There are still 2-3 nice abseils in the lower part, but at the exit it stretches a bit until you reach the dam. (machine translated)
