<b>Gear:</b> Ropes: 1x 30m		
<b>Summary:</b> (machine translated) Watery great canyon with smaller rappels, some climbing and swimming passages		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From Nice on the N 202 northwards in the direction of Digne. After about 17 km on the bridge Charles Albert over the Var turn left and the D 17 up to Gillette and on winding road further behind in the Esteron valley to Roquesteron (about 26 km from Var bridge). 3.5 km after Roquesteron turn left onto the D 10, after another 3.5 km cross the bridge at the exit of the Riolan, after another 4.5 km you reach the village of Aiglun. At the western exit of the village there is a large parking lot also for the gorges. With the second vehicle you go back to the D 17 and there turn left to Sigale. From here along above the Clue de Riolan to the road junction at Pont de Miolans (7 km on the D 17). Here turn left onto the D 2211 and after about 4 km turn left to the village of Sallagriffon. Park the second car in the large parking lot in front of the village.		
<b>Approach:</b> (machine translated) From the parking lot, walk a few more meters in the direction of the village and then turn right onto the first dirt road (marked "75"). Via "75a" you reach a ridge that opens the view to the entrance of the Aiglun gorge. You come to an information board. At marker "75b", one turns right from the trail onto a path and descends in a southwesterly direction to the stream. If you have only one vehicle, you can reach the entry from the village of Aiglun on a mountain path over the ridge of Mont St Martin (1257 m), see also wikiloc link.		
<b>Tour:</b> (machine translated) With 170 square kilometers of catchment area, the attractive canyon with its narrow wood-blocked passages is life-threatening when the water swells. Similar to the neighboring Riolan, the water is regularly murky, so the few slinging options must be explored beforehand. Partly, fixed ropes are used across and above the chute to avoid the tedious and sometimes difficult climbing over the blocked wood in the chute.		
<b>Return:</b> (machine translated) 100 m before the road bridge, the sign "Sortie" obligatorily indicates the exit. You climb up a good path (beautiful views!), then see the village of Aiglun at the top and then reach it in a few minutes.

Automatisch importiert von Descente-Canyon.com für Canyon Aiglun Normal-low, we didn't use our rope. We did the climber path walk-in, a beautiful hike taking about two hours. Automatisch importiert von Descente-Canyon.com für Canyon Aiglun Bon débit, posé 1 main courante multipoints au 2e ressaut et sinon escalade/désescalade pour éviter les nombreux embacles. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2223/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Aiglun Debit conséquent et eau laiteuse suite aux pluies de la veille. On a fait demi tour aux 1ers obstacles où l'installation de la main courante RG paraissait bien utile voire nécessaire (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2223/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Aiglun Que dire...Une météo absolument parfaite, T° de l'air 35°C, T°C de l'eau je dirais aussi "Tarpin bonne".Un DC+, on a juste tiré une main courante au dessus de l'amas de tronc dans la première partie pour finir en rappelle et esquivier la cascade qui tabassée trop a notre goût et bloqué par les arbres...En tout cas un canyon absolument magnifique, descendu en 2h a 3 en prenant du très bon temps ! Automatisch importiert von Descente-Canyon.com für Canyon Aiglun Le débit me semble correct pour ce canyon aquatique. Magnifique ! Posé juste une main courante pour éviter un mouvement d'eau sous une cascade très arrosée. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2223/observations.html>)
