

Trümmelbach V

Trümmelbach

Create: 2023-03-09 20:54:21	Update: 2023-12-21 21:24:30	Print: 2024-12-22 04:12:25
Country: Schweiz / Switzerland Region: Kanton Bern / Canton de Berne Subregion: Verwaltungskreis Interlaken-Oberhasli / Interlaken-Oberhasli administrative district Town: Lauterbrunnen		
Difficulty: difficult	Grading: v5 a5 V	Total time: 4h55
Approachtime: 50min	Tourtime: 4h	Returntime: 5min
Altitude entry: 1085m	Altitude exit: 825m	Delta Altitude: 260m
Canyon length: 470m	Highest rapell: 48m	Amount rapells:
Transport: on Foot	Rock type: limestone	drainage area: 23.00km ²
Season: November - December	Orientation: Northwest	Best Time:
Rating: ★ 5 (6)	Info: ★ 1.3 (3)	Belay: ★ 1.2 (5)
Specialities: Glacier in drainage area, Winter canyon, § Regulated, Permit required,		
Gear: Ropes: 2x 55m Headlamp,		
Summary: (machine translated) Alpine, gloomy and watery glacier gorge. May only be climbed after prior reservation by telephone 0041 33 855 32 32 and in the period 15.11 - 15.12 and 10.01 - 15.03. Can be combined with Trümmelbach IV and/or Trümmelbach III by very fit groups.		
Hydrology:		
Access: (machine translated) Coming from Bern we leave the A8 via exit 25 - Wilderswil and take the road south to Lauterbrunnen. From there we continue towards Stechelberg. 3.3 km (calculated from the train station, parking garage) after Lauterbrunnen we come to the large parking lots at the restaurant Trümmelbach. Please do NOT park here, but continue for about 2km until you reach the large parking lots of the Stechelberg cable car on the left.		
Approach: (machine translated) On the road 25min back in the direction of the canyon (a post bus leaves every 30min), before you reach the tourist parking lot at the restaurant turn right onto an access road and continue on the hiking trail in the direction of Wengen. We come after many, partly secured serpentines to the bridge over the Trümmelbach (entry).		
Tour: (machine translated) A little over 20 rappel in mostly gloomy atmosphere, stretches also in complete darkness. Anchors mostly only monopoint. At the highest waterfall there is an intermediate belay after about 30m left in the angle.		
Return: (machine translated) Where we reach the wide streambed, out left and along the edge of the forest to the access path. Take this back to the road and continue to the car		
Coordinates: Canyon Start 46.5672 7.9179 Parking Entry and Exit 46.5566 7.9017 Canyon End 46.5698 7.9131

Top conditions!!!! (machine translated)

2024-11-16 | Flurin Lanz |★★★★★|📖|★|📍|★|🌊 Low |👍 Completed

Very beautiful but cold canyon. Please do not underestimate it. The conditions were ideal. The intermediate level on the C50 is missing. 100m of rope was perfect for the whole rappel. We were 2 experienced canyonists and needed 2h 15min. (machine translated)

2024-11-16 | System User | |📖|📍|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Trümmelbach V Perfect conditions for our first ascent! ±50-70 L/sec, ±7 °C in Lauterbrunnen. The last section of the trail, down to canyon, is a bit icy and slippery; may get worse after snowfall next week. Super grip in canyon. All anchors are in good conditions (most mono, except largest descents). C48 indeed missing the rebelay but the descent goes fine in 1 push. Rope pull from the bottom is good (a bit sharp edges 10m from bottom). All anchors except the one before the last C23 can be reached safely without rope belay (but probably not when flow is high). Done in 3:20 h with 2.Park in Lauterbrunnen and take the bus (parking at canyon exit forbidden). (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22233/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Trümmelbach V Toujours aussi grandiose, il n'y a plus de point a l'intermédiaire au niveau du geyser. Nous avons rajouté un point au niveau de l'arche. Sinon rien d'autre à signaler. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22233/observations.html>)

2024-11-11 | Bigoudi88 |★★★★★|📖|★|📍|★|🌊 Normal |👍 Completed

As grandiose as ever, there's no longer an intermediate point at the geyser. We added a point at the arch. Some of the points should be doubled, but I know that's not the norm in Switzerland. (machine translated)

Great, dark, aquatic. No problems with ice and therefore less demanding than Gamchi & Gries but still wild enough. One of several international groups allowed to go through the gorge that day. Be sure to call ahead to sign up. (machine translated)
