| Summary: (machine translated) Conglomerate rappel canyon | | |
| Hydrology: | | |
| Access: (machine translated) From the Barbastro - Huesca road (N-240), about 25 km after Barbastro, turn right on the A-1229 towards Abiego, Rodellar. A few hundred meters after Abiego, turn left towards Bierge. In doing so, we cross the Rio Isuala, which we will later go up or down in the Estrechos de Balcés. We take a first cautious estimate of the water level at the bridge. A few meters before reaching the village of Bierge, we first turn right, but then immediately left, towards Rodellar, "Barranco de Mascun". 6.8 km after this intersection, in a prominent left turn, there is a suitable area to park our car. a second vehicle we can park either at the large oak tree at the starting point of an ascent of the Cueva Cabrito (cf. there) or at the bridge over the Rio Izuala on the road from Bierge to Adahuesca. The choice of the alternative depends on the chosen way back (cf. below "Exit"). | | |
| Approach: (machine translated) From the meadow, which is fenced to the road, 2 slopes depart in a northerly direction. We take the lower one (eastern) and follow it, first in northern, later more in northwestern direction. We ignore the turnoffs to the right and to the left. On the ridge between the Bco. Cueva Cabrito ond Alborceral we meet a track coming from the left, which we follow for about 100 m downhill to the right. Here a path marked with cairns turns at a right angle and leads us through undergrowth to the entry (700m a.s.l.). The access can also be done via a left tributary, see Canyonisme - La Sierra de Guara. Randonnées, Randonnées acuaticques. Patrick Gimat, 2005 at p. 164 ff. | | |
| Tour: (machine translated) 8 Rappels | | |
| Return: (machine translated) Upon reaching the Balcés Estrechos (Rio Isuala) either upstream, past the mouth of the Cueva Cabrito and then up the ascent trail from the Cueva Cabrito to the parking area under the tree (2 hrs cf. there) or down the Estrechos to the bridge at the Bierge - Adahuesca road (3 hrs). | | |

As access to the Estrechos de Balcés It is important to keep an overview of all the side arms. During access we came across another group who tried to convince us that we were in the neighboring canyon, where our ropes would have been too short. Fortunately, I was able to determine our exact position via gps Video of the tour: https://www.youtube.com/watch?v=8iC0xS5p_xl (machine translated)
