Summary: (machine translated) With water flow very attractive rappel canyon		
Hydrology:		
Access: (machine translated) From Nice on the N 202 north towards Digne; after 20 km turn right into the valley of the Vesubie towards Lantosque, Roquebilliere. After about 14 km on the D 2565 you reach Suquet with campsite and hotel. Immediately after, turn left (D 373), a little later turn right in the direction of Pelasque. You pass the hamlet of Farguet. Shortly before reaching Pelasque, turn left at a fountain and at the exit of the road you come to the hotel Auda (not managed in 2006). Here you become a shade parker.		
Approach: (machine translated) Continue along the road, which is no longer paved, until you reach the mark "143", where a path branches off down to the left, which we follow. We march - at least temporarily - along a dried up water pipe, cross a stream and finally come to the bridge over the Figaret. Here we will get off later. Now we go strongly uphill, passing the ruins of a Bergerie, until we reach the mountain shoulder at altitude 1030 m above sea level. Here we leave the path that continues to the right and descend beyond to the streambed of the Bagnolar. On the opposite slope you can see a house of the hamlet of Les Barmes.		
Tour: (machine translated) Start in a small Wldgrave, with the successive deepening also the rappel become higher. Some jumps possible. The Bagnolar would be an attractive canyon, if one would not regularly (already in May) in the lower part only find standing water in the pools. In midsummer, a nose clip should be part of the equipment here. However, there is the possibility to get off at about half of the canyon to the left to the ascent path. The descent of the attractive Figaret is - unfortunately - forbidden.		
Return: (machine translated) After reaching Figaret in this stream up to the bridge (about 5 min.) and then on the approach path back to the car (another 25 min.).		
Coordinates: Canyon Start 43.9714 7.2501 Canyon End 43.9705 7.2594 Parking Entry and Exit 43.9595 7.2706

Automatisch importiert von Descente-Canyon.com für Canyon Bagnolar Première partie ça coule doucement c'est très beau et très agréable. Soudain au niveau de l'échappatoire plus d'eau. Je vous conseille de sortir car les vasques sont pourris. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2229/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Bagnolar Départ DC puis au fur et à mesure petit filet, pour s'interrompre avant le deuxième échappatoire matérialisé. Les vasques du dernier encaissement étaient toutes sales et ne donnaient pas confiance, on a eu la flemme de se baigner pour choper la Polio donc hop échappatoire... dommage ! Sinon c'est vraiment classe, mais l'approche se mérite. Descente partagée avec le camarade ricardoca qui est de bonne compagnie (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2229/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Bagnolar Canyon toujours aussi beau, nous aimons bien son côté sauvage. Nous avons eu une météo au top. Le canyon coule encore en majeure partie, il est sec en fin de parcours avec des vasques qui commencent à sentir, mais on se rince volontiers dans le Figaret avant la marche retour. Automatisch importiert von Descente-Canyon.com für Canyon Bagnolar DC- sur l'amont qui valait le détour, et plus rien sur l'aval. Les vasques croupies étaient plutôt "propres" et laissaient tout de même l'intérêt de poursuivre le canyon dans une ambiance calme et agréable. Eau bien froide mais supportable sans les gants.
