Summary: (machine translated)

Watery great canyon

Hydrology:

Access: (machine translated)

From Chambéry on the N 6 in (southern) direction to Les Echelles (24 km from Chambéry). From there, continue on the N6 (now in a westerly direction) to Chailles (another 5 km). About 500 m after Chailles you can see the dam on the left side; next to the road there is a big place to park the 1st (upper) car with an information board.
With the second sth continue 3.5 km down to the crossing at St Beron. Here turn left onto the D 203 in (southwest) direction St Albin. After the bridge over the Guiers keep left in the direction of Voissant. After crossing a small river soon turn left to Verchere. Go through the hamlet, down towards Guiers, turn right at the T-junction and go downhill. Before the road rises again, park the lower vehicle at a suitable place.

Approach: (machine translated)

From the upper vehicle a small path steeply down to Guiers.

Tour: (machine translated)

Impressive great canyon below a reservoir. Pay good attention to the existing siphons! If possible go at low water. Good to combine with the nearby Grenant.

Return: (machine translated)

According to the current regulation, one climbs steeply on ropes to the left to the canal (on the signs at the upper vehicle called "échappatoire") and follows this up to the second vehicle before the transition inlets of the canal in the Guiers. This exit is just before a siphon, which you have to bypass anyway and is recognizable by a cemented iron bar (earlier obviously warning sign).
The conventional (more comfortable) exit (on said and in this respect no longer current sign "sortie") was about 300 m later after the opening of the canyon (100 m after) left up and under the large water pipes to the car. Problems may arise here now with the fishermen.

Automatisch importiert von Descente-Canyon.com für Canyon Chailles DC, DC+. Pas de problème avec ce débit, que du plaisir, mais on sent bien qu'il ne faut pas beaucoup plus d'eau pour que ça devienne très très sportif. Un classique de la région que je n'avais pourtant pas encore fait : une pépite ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2114/observations.html>)
