Summary: (machine translated) Forest Gorge		
Hydrology:		
Access: (machine translated) From Saint Claude we take the D124 direction Les Bouchoux. We pass a sports facility (on the left) and a traffic circle at the exit of Saint-Claude. A few meters after leaving the traffic circle, the road crosses the Tacon ("our" stream). 4.1 km after the bridge, the road forks. We turn left onto the D290 in the direction of Coiserette. 550m further on we find parking bays on the right and left of the road and park our car here (for the approach see also Google aerial photo in "Photo gallery").		
Approach: (machine translated) We continue along the road. Where it emerges from the forest, we take the path that leads down to the left at the edge of the forest to the stream, where we enter above the 1st cascade that we can see. Possible is also an (entry) jump from a chute about 10m to the left of the waterfall.		
Tour: (machine translated) See topographic view, photos & videos 3 parts, the stretch in between walk on the path on the bank and not in the streambed.		
Return: (machine translated) After the 3rd part we take the clear path on the left up to the road and then go left on it to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Coiserette Belle découverte qui mérite sa cotation. Les gants sont plutôt recommandables en cette periode. La troisième section est courte mais très étroite avec des embâcles qui peuvent compliquer la descente. Le canyon était particulièrement glissant.
