<b>Summary:</b> (machine translated) Attractive forest gorge		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) Leave the A 10 freeway (Genoa - Ventimiglia) at the Imperia - East ("Imperia-Est") exit and head north on the SS 28 towards Pieve di Teco (Colle di Nava; Torino). After a good 23 km we reach Pieve di Teco and 2 km after the village we turn left from the SS 28 onto the provincial road in the direction of Mendatica/Monesi. After another 2.5 km (from the turnoff) the road takes us across the river Aroschia (just after the bridge on the left there is a good parking area for camper vans). After another kilometer we enter the village of Ponti di Parnassio. Right at the beginning there are parking places on the left of the road where we can park the car. \nIf we approach from the area of Genoa on the A 10, at the exit "Albenga" we turn right on the SS 582 in the direction of Albenga and immediately after that we turn right again on the SS 453. After about 26 km we reach Pieve di Teco. Continue as above. \nIn the indicated sites, a different parking lot is suggested and, accordingly, access from the beginning on the orographic left side of the Rio S.L.		
<b>Approach:</b> (machine translated) We continue to follow the road - on the right there is a turnoff over the Rio Aroschia into the historic old town - and then turn left up the next street. Passing under some arches, we reach the last houses, where the road becomes a dirt road that we follow until we reach the bridge over "our" stream (Here you can check the water flow). We pass under the porch of a chapel and continue uphill. After the forestry road has returned to the stream, it makes a right turn and shortly after, the path goes down to the left to the stream. It is marked with "Procanyon" markings (blue dots on white rectangle).		
<b>Tour:</b> (machine translated) A lot of downclimbing; further on some attractive narrow sections with possible jumps and a super slide.		
<b>Return:</b> (machine translated) At the water diversion out to the right, downhill to the bridge and from here on the access path back to the village. \nIf you have stened the car in the alternative parking lot, continue down the stream almost to the road.

Automatisch importiert von Descente-Canyon.com für Canyon Santa Lucia (inférieur) Si comme nous vous ratez la sente qui descend vers le canyon, vous verrez sur votre gauche un chemin en balcon carrossable 4\*4 herbeux qui passe par dessus le canyon sur un pont en pierre. Puis une sente permet de descendre dans le canyon, ça ne rajoute que 10 mn de canyon. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2949/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Santa Lucia (inférieur) Nota per trovare l'ingresso al canyon. Dopo aver parcheggiato la macchina prendere la strada sterrata e risalire esattamente x 1.9 km fino ad incontrare sulla sinistra un cartello appeso ad un albero con la scritta in rosso 5 1/2 a quel punto parte una traccia di sentiero (all'inizio parallela alla strada sterrata) che in 5 minuti porta all'attacco. La traccia è piuttosto evidente ma con l'erba alta può essere difficoltoso individuare la partenza. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2949/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Santa Lucia (inférieur) DC+ amarrages ok mais ayant subi les crues. Le plus simple pour se repérer dans l'approche: sur la piste il y a des numéros rouges, rentrez au numéro 3 (gros chemin) ou plus haut numéro 4 (rubalise rouge blanc) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2949/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Santa Lucia (inférieur) On n'a pas trouvé le chemin indiqué sur le descriptif à 60m de l'épingle. On a pris le chemin 200m avant avec une pancarte marquée d'un 5 rouge. Bien sonder les vasques car beaucoup de blocs remplissent les vasques. Ça reste un beau canyon.
