Specialities:		
Gear: Ropes: 2x 25m		
Summary: (machine translated) Entertaining canyon suitable for beginners. Accordingly much frequented. Carries water for a relatively long time.		
Hydrology:		
Access: (machine translated) From Palma de Mallorca follow the road towards Soller. At Bunyola turn right and follow a winding road towards Orient. After the mountain pass several hairpin bends before you can park after the last leftward hairpin bend. Auch approach and approach from the bottom of Santa Maria de Cami possible (http://www.wikiloc.com/wikiloc/view.do?id=3901753) See also parking lot.		
Approach: (machine translated) Follow the marked hiking trail towards Santa Maria through a wide valley to the stream. Several karst springs emerge here, which soon plunge into the depths over a 25m waterfall, the Salt des Freu. Depending on your preference, you can enter above or below the waterfall. If the entry is below, a 30m rope is sufficient for the rest of the route.		
Tour: (machine translated) The 25m Salt des Freu is followed by another 15m waterfall (both can be bypassed on the left bank) before a longer walking passages begins with a few jumps and slides (if not dry). After about 400m the valley narrows again and the actual canyon begins with a 4m jump into a narrow basin. In the gorge there are many low rappel/jump passages up to max. 15m. Exit after a 5m drop formed by a large rock (slide right or rappel left). A gate in a fence is visible on the left.		
Return: (machine translated) Go through the gate and follow the path to a picnic area. Turn left here and follow a beautiful path high above the canyon back towards Orient. The locals obviously prefer to climb back through the canyon - lots of canyons in the tufa rock.

Automatisch importiert von Descente-Canyon.com für Canyon Coanegra La tempête a effectivement bien endommagé le canyon c'est dommage. Les deux premières cascades coulent mais on peut descendre que la première. L'autre est bouchée par les troncs. Après la marche on retrouve un petit actifs. Vasques pleines et propres avec de petits sauts possibles. Final sec (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2846/observations.html>)

Super water level at first waterfall, then less but easy flow. Stands all ok. At the approach and at the beginning of the gorge many fallen trees, but you get through well! (machine translated)
