All anchors are still there. At the moment the canyon is very grippy. (machine translated)

Quite sporty water level. Not impossible as rarely through the main water jet. The main danger is the stones that the water drags along. Take a little care there. Orographic right intermediate belay damaged during the big rappel, which is why we took the left one. Ans. Relatively good stances but a bit loose. A wrench for retightening is almost a must. We also had it with us and tightened the stances we used. (machine translated)

Scenic short tour with spectacular final waterfall. All belays in good order and mostly designed as double expansion anchors with a ring. (machine translated)

Everything ok. In places a few anchors too much... With rope jam in 1:15 through (machine translated)
