Summary: (machine translated) Short, beautiful tour; clean, cold water; short access; at high water levels, however, dangerous single spots; limestone (untersberg marble).		
Hydrology: Wasser fließt nach Starkregen schnell ab.		
Access: (machine translated) approx. 10min From Sbg. south one drives on the B305 always straight ahead in the direction of Berchtesgaden (D) --> approx. 500m after the border (St.Leonhard) comes a small bridge (yellow round sign 24/24) --> immediately after the bridge one has right a small entrance with parking possibility in the forest (approx. 530m).		
Approach: (machine translated) approx. 25min Across the creek or from the road, you reach the wide hiking trail that leads up into the forest on the right (or.li.)--> after a few meters there is a fork, here follow the narrow steep path on the left --> parallel to the canyon it continues up --> at about 690m the path becomes flatter for a short time, here immediately at the first steep grassy slope descend on the left or rappel over trees into the canyon (a little further up you could also enter the canyon, but it is less interesting) entry at about 660Hm.		
Tour: (machine translated) approx. 1-1,5h The rather open Weißbach canyon has two approx. 25m high and several small downclimbing passages --> depending on the water level, the small steps can often also be climbed down --> at normal water levels, the well-equipped canyon is also suitable for beginners --> between the steps (downclimbing passages) there are short walking passages and small slides with washouts --> after the last approx. 8m downclimbing passage, it becomes flat --> the last boulders are still climbed down before it then goes approx. 10min in the flat streambed to the starting point.		
Return: (machine translated) ca.0min From the shallow streambed descended right directly to the parking lot.

< 24 hours after the heavy rain, the conditions are perfect. Water volume high and temperature fresh, but clear and (with appropriate experience) high fun factor Anchor points are mostly very good. Mostly chains. In one uncritical spot, the bolt appears to be a little too little in the rock (machine translated)

Good quality! Super quick walk in, fantastic anchors over cool waterfalls. Nice with some flow.

The canyon has now been set up almost like the Auerklamm 📖 in part with several chain anchors and fixed rope traverses at the abseiling points. The lower section is probably used more often than it was a few years ago. (machine translated)
