| Summary: (machine translated) Rappel canyon with a (optional) cave passage | | |
| Hydrology: | | |
| Access: (machine translated) From Annecy on the western shore of the lake of the same name on the D 909 (from the highway it is better to drive around Annecy on the D 16) in the direction of Thônes or La Clusaz. Before you cross the river Fier (after about 14 km), you will see the war cemetery "Cimitière militaire de Morette" with the "Musée de la resistance" on the right of the long straight road. Park the car here in a suitable place. | | |
| Approach: (machine translated) From the southern exit of Kriegerfriedhos we take the GR 96 to the right and climb relatively steeply on a path in a westerly direction. The track makes first a left, later a right serpentine. About 200 m later, after a slight bend to the left, a forest path branches off from this track and leads to a larger house in a clearing. We initially follow this path, but then cross below this property through a spruce pole forest to the west and come to the streambed. | | |
| Tour: (machine translated) After 3 smaller rappels, an underground passage gives the "Beautiful Unknown" its special charm. Alternatively, you can rappel outside the grotto. After that there are two attractive longer rappels.\nA combination with the Morette descending on the opposite side of the valley offers itself. | | |
| Return: (machine translated) If you don't want to check off the last two rappels in open terrain (and therefore of little interest) as well (C 25 and C 10), climb out of the streambed to the left after C 32 (below the natural arch) and look for a path down to the road (D 909). | | |

Automatisch importiert von Descente-Canyon.com für Canyon Belle Inconnue DC aujourd'hui dans la belle inconnue. Équipement RAS même si vieillissant par endroit. Trois grume de bois dans la dernière vasque donc attention au rappel de corde (possible coincement). Vasque jamais profonde. Automatisch importiert von Descente-Canyon.com für Canyon Belle Inconnue RAS équipement Gros débit après la pluie, donc on a évité la grotte et le rappel sous l'arche. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2900/observations.html>)

2024-09-08 | System User | |📖|📍|🌊 Low |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Belle Inconnue Petit filet d'eau en haut qui arrivé en bas nous a bien arrosé dans la 32 finale, la petite partie souterraine est vraiment sympa (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2900/observations.html>)

2024-09-01 | System User | |📖|📍|🌊 Dry |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Belle Inconnue Vraiment sec sur le début, pas vraiment extra. Ça devient intéressant à partir de la grotte, frontales bienvenues. Petzl en à fait un poster, il y a peut être d'autres canyons à postériser ? (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2900/observations.html>)

2024-08-19 | System User | |📖|📍|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Belle Inconnue DC+ pour le canyon. Ras, C32 toujours aussi glissante et la sortie de la vasque est entièrement remplie de tronc d'arbre et de branches. Ca mériterait un bon nettoyage. Automatisch importiert von Descente-Canyon.com für Canyon Belle Inconnue Plus que quelques jours avant qu'il n'y ai plus rien et que l'eau soit croupie ! Passage dans la grotte par conséquent parfaitement praticable (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2900/observations.html>)
