<b>Specialities:</b>		
<b>Gear:</b> Ropes: 2x50m		
<b>Summary:</b> (machine translated) rappel canyon, in the first part mostly dry, last third after karst spring with water flow		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From Huesca we take the A-23/N-330 north to Sabinanigo, from there we continue on the N-260 to Biescas (68.5 km to this point). We continue for another 12.2 km towards Col de Portalet and we turn right onto the A-2606. After 3.3 km we pass the village of Panticosa and after a total of 3.6 km (from the A-136) we come to a steep dirt road that branches off to the left. It describes first a left, then later a right curve and moves now quite horizontally to the NE. We come to the Bco. del Monde and park our car here, where a trail begins.		
<b>Approach:</b> (machine translated) It goes orographic. right bank up to the mentioned Bco. At about 1420 m altitude the path bends to the NE. After possible difficulties with wayfinding, we come to Forronias at an underground water drainage (entry). See: <a href="https://www.wikiloc.com/canyoneering-trails/aproximacion-forronias-14037259">https://www.wikiloc.com/canyoneering-trails/aproximacion-forronias-14037259</a>		
<b>Tour:</b> (machine translated) Approx. 15 rappels; first 7 dry rappels, then to the right a spring that cannot aliment the streambed in summer. After another 4 rappels, the descent then becomes more aquatic, as on the right a karst spring presses its water from the rock face. From here 3 more rappels and we come to the final chord, the overhanging 42 m - rappel. Then down in the scree streambed until we can exit to the right onto the slope.		
<b>Return:</b> (machine translated) On the slope on the right we come to the car.

## Reports:

2024-08-18 | System User | |📖|📌|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Forronías Pas d'eau sur les 10 premiers rappels, l'eau sort à la résurgence puis la seconde vient compléter le tout pour finir de se rafraîchir (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21502/observations.html>)

2024-07-26 | System User | |📖|📌|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Forronías Le début du canyon etait sec dès le départ mais les premières vasques pas encore croupies. Lorsque l'eau revient, on est ravie de mettre la veste car l'eau est froide mais les ancrages sont positionnees principalement en dehors des cascades. La descente en est facilitée! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21502/observations.html>)
