<b>Summary:</b> (machine translated) rappel canyon		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From the highway exit Biasca drive to the center of Biasca and park your car behind the train station directly at the striking crossed waterfall.		
<b>Approach:</b> (machine translated) Next to the final waterfall orographically right on a small path steeply up. Cross the bridge and now climb orographically left on a marked path always near the stream until you reach the vicinity of a house (Cantoi - 645 m a.s.l.). Here you climb to the foot of the high waterfall to the entry to the lowest part of the Froda (600 m altitude).		
<b>Tour:</b> (machine translated) If you are looking for a very vertical demanding canyon is exactly right here --> in this canyon you should have a good rappel --> as well as weather and water should be optimal --> you can start the canyon after the 115m rappel (inferiore) or at the very top (see Froda superiore) --> to be careful with the ropes always give enough rope (partly very sharp edges) --> basically you have a breathtaking view in the whole canyon --> to enjoy this you have to be brave --> be careful in the lower part (after the stone bridge) --> danger of falling rocks by rope retrieval or bathers.		
<b>Return:</b> (machine translated) From the water directly to the car.
