Summary: (machine translated) rappel canyon		
Hydrology:		
Access: (machine translated) From the center of Grasse on the D 2085 in a northeasterly direction to Chateauneuf-Grasse. From here, continue north on the D 3 up to Gourdon. There you will find a large parking lot at the prominent crossroads outside the town.		
Approach: (machine translated) From said intersection on the D 12 about 300 m in a northerly direction slightly uphill, then turn left onto a small road that runs below the D 12 in a westerly direction. After about 600 meters you pass two large concrete well troughs and shortly thereafter cross the Gourdon. Here you look for the access through the vegetation at some distance from the stream.		
Tour: (machine translated) As long as water flows into the summer, the Gourdon is quite appealing, not least because of its surroundings. The road bridge of the D 3 divides the descent into two parts. \nThe lower part is disturbed by several steel cables, which were apparently installed to emphasize the fun character.		
Return: (machine translated) Below the last rappel, a large pipeline crosses the Gourdon. On the pipeline road, go left (NE) until you meet the Chemin du Paradis. On this path you go up to the village, where you have to cover only a few meters to the parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Gourdon (amont) Le canyon est complètement déséquipé...Vandalisé. Ça passe sur amarrages naturels jusqu'à l'enchaînement final où là ça se complique avec le débit de ce jour. Nous sommes sortis juste avant la fin en rive gauche. Ça remonte dans les restanques jusqu'à la route. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2868/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Gourdon (amont) Joli canyon avec le soleil du jour et l'eau de pluie des jours précédents. Toutes les vasques sont en eau sur les 3 parties, sauts possibles dans certaines... Car je confirme, les équipements du canyon ont été complètement vandalisés. On peu voir sur la première partie les encrages sciés, et dans la suite pliés contre la paroi.1 anneau de corde installé sur les deux premières cascades, ainsi que sur la dernière. Autrement, tout sur AN (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2868/observations.html>)
