Résumé: (traduction alternative) Relatively open aquatic rappel canyon with some possible jumps		
Hydrologie:		
Accès: (traduction alternative) see approach routes and implementation route in photo gallery. This is how we get to the houses of Donnes (865m altitude).		
Approche: (traduction alternative) To the Fer inferiore: Directly from the car a path leads steeply down to the creek in the direction NW.\n\nTo the upper entry for the integral ascent we take the slope at the car parked above, which first leaves in the direction NNW, later in the direction SSW towards the creek. When the path crosses the stream, we get on.		
Tour: (traduction alternative) 20 rappels in total, 9 rappels in the lower part in a great ambience. Relatively open at the beginning, increasingly incised as the lower part progresses. Possible jumps. Exit via a small metal ladder to the right onto the path by the water drainage.		
Retour: (traduction alternative) We follow the path in the forest (parallel to the stream) to the lower car.

Automatisch importiert von Descente-Canyon.com für Canyon Fer fait que la partie basse en prenant le chemin raide qui part à droite du pylône électrique - à l'arrivée dans le canyon, MC droite (ne pas descendre dans l'eau) et rappel - belle vasque finale avant le captage (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2953/observations.html>)

Fer is certainly a beautiful canyon, but in my opinion it is generally overrated. There are more rewarding canyons in the Aosta Valley. Video of the tour: https://www.youtube.com/watch?v=IP_nWFWfviA (traduction alternative)
