Résumé: (traduction alternative) Nice, not difficult tour in sunny, open ditch. Access perfectly combinable with the cozy, beautifully built gorge via ferrata. Scenic, well suited for beginners.		
Hydrologie:		
Accès: (traduction alternative) After Klebas on the main road in Lesach valley. Turn in the direction of Tscheltsch, then to Ladstatt. Then under the town bridge from the farm through and left up the gravel road. At the access simply follow the signs "Klettersteig Millnatzenklamm". The parking lot has been subject to charges since 2015.		
Approche: (traduction alternative) After the barrier you come to an overview board. From here, highly recommended access via the Millnatzen via ferrata: Difficulty C, two short more challenging spots, but overall stress-free to do with complete canyon equipment (incl. via ferrata set!). Access to via ferrata 15 min; via ferrata 60-80min. Millnatzenklamm via ferrata at http://www.bergsteigen.com/klettersteig/kaernten/gailtaler-alpen-lienzer-dolomiten/millnatzenklamm-klettersteig . Alternatively, it is possible to ascend from the overview board the descent path of the via ferrata orog. right (approx. 25min).		
Tour: (traduction alternative) Directly at the sign "exit" of the via ferrata it starts. Emergency exit on the via ferrata but also from the canyon itself always possible. Water flow comfortable, but quite appealing, but except for the C30 actually avoidable if not desired. Sunny tour in scenic with many canyon voyeurs when the via ferrata is well visited. Route is largely provided with chain anchors and 14 numbered emergency plaques. Places that can also be downclimbed are provided with a neatly set anchor. The highest rappel point has an honest 30m (my 55-rope was a whopping 5m-rep cord length too short).		
Retour: (traduction alternative) After the last rappel point, go around the next bend in the stream and turn right onto the access path to the via ferrata.

Easier canyon along via ferrata. Good views. A lot of escape options, Confirming 30m rappel but most of the obstacles can be bypassed through via ferrata.
