Résumé: (traduction alternative)

In the upper part short gorges alternate with hiking passages, the lower part with little water leads through a very beautiful narrow gorge.\nSlide and rappel canyon

Hydrologie:

Accès: (traduction alternative)

From Bled follow road 209 until about one kilometer before Bohinjska Bistrica, here turn right onto the road to Jereka. Before reaching the church of Jereka, turn left and follow the road uphill until you reach a paid parking lot under a small quarry.

Approche: (traduction alternative)

If you want to go only the lower part of the canyon, follow the forest road from the parking lot into the valley, cross the mostly dry streambed here and climb about 50m until the forest road at a dam with water drainage meets the stream again. \nIf you want to walk the entire canyon you continue on the forest road which becomes increasingly steeper and more overgrown. After about 15 minutes you meet a crossing path that you follow back to the left into the canyon. Here is the entry. It is probably also possible to drive with a second car to the upper bridge over the Jereka and enter there, or from the leftward hairpin bend below the cluster of houses of Podjelje across alpine meadows into the canyon.

Tour: (traduction alternative)

Many slides and low rappel up to max. 15m in a section of wonderfully washed out gorge. \nEngstellen alternate with walking passages. Due to many emergency exits and little water flow also feasible in bad weather. (Not only) for beginners worthwhile gorge. For protection - in the upper part moderate, in the lower part excellent.

Retour: (traduction alternative)

After the rock gate, the gorge suddenly opens and you find a trail on the right bank, which you follow back to the access forest road.

To correct the description. This canyon can be very dangerous in bad weather since the water level can rise quickly, so if you are in narrow part, you cant escape. There were already some rescues and death accidents.
