Résumé: (traduction alternative)

Long, vertical and wild tour in a very remote corner of Friuli

Hydrologie:

Accès: (traduction alternative)

A23 to Osoppo exit, then via San Daniele, Ragona, Pinzano and Sequals to Meduno. From here towards Passo Rest. At a dam turn left over the top of the dam and go through Tamarat and Chievolis. After the second village, take a narrow road high above the canyon of Torrente Silisa until you reach the houses of Selva. Here turn left towards Forcella Clautana. Follow the narrow, mostly asphalted road until it gets close to the streambed again for the first time. Here you can park 5 cars.

Approche: (traduction alternative)

Descend the embankment and cross the Torrente Silisia. In the mouth of Silisia and our stream go up and follow an indistinct path along the ridge until you reach a renovated house (Stua) (Here also via a second path that starts about 300m upstream at a piece of corrugated iron leaned). Behind the house, first flat then steep for a short while to a serpentine path that you follow to the ruins of Pecolat. Behind the ruins on a transversal former mule track and follow it at first without gaining altitude. At two forks, climb up to the right, finally climbing very steeply and on a barely recognizable path to a flattening in the ridge (ruins of a cable car station). Follow the narrow ridge until it splits again, here turn right onto an indistinct path. Shortly through the bushes, then traverse very exposed above a rock face (dangerous in wet conditions). Cross the path ascending on the traces of the path, with beautiful views to the big waterfall of Fontanon del Tasseit (path in the woods somewhat visible, on the meadow ribs climb up in doubt until you can cross again to the right). Descending into a side valley without a name, descend over scree and cut mountain pine climbs to the streambed. Cross the stream and on the other bank on a very indistinct path up to a watercourse from the right (above on the other bank a large cave entrance). To the right of the side stream climb very steeply over grassy slopes, then keep to the right (trail tracks) up to a small forest saddle. Climb another 50m very steeply onto another ridge flattening and at a small beech with carved 'font' descend eastward crossing a gorge-like streambed (the only way to overcome this streambed). On the other side, climb briefly and always staying just below the rock walls until the beginning of the tour at a karst spring (Risorgiva del Randonneur).

Tour: (traduction alternative)

First 4 abseils to 30m from trees, then two abseils in narrow gorge from bolts before facing the big waterfall. Abseil sequence: 10m from tree right, 40m from chain left. 75m from chain left (can also be divided into 25m and 50m, hanging position). Then 5 rappels in narrow canyon before the previously crossed side creek with a sloping 80m+ waterfall coming in from the right. After longer walking passages with a few diving pools, nice 25m rappel from the right. Further- walking and downclimb to a 5m rappel followed by a three meter rappel. The canyon ends with a 13m jump (abseilable and repeatable) and a 5m jump into a fairly shallow pool (abseilable on the right).

Retour: (traduction alternative)

Through the streambed back to the parking lot
